

Field Wire Conversion Module for Modicon B827-032 to 1756-IB32 (Cat 1492-CM800-LD010)

Local language (French, Italian, German & Spanish) versions of this document can be downloaded by going to www.ab.com. In the left margin click on Publications Library and Literature Library. In the Search Area (right margin), Search by Catalog Number and in the Search box type in the catalog number of the conversion system component.

I. Module Description

The 1492-CM800-LD010 conversion module provides field wire signal conversion from a Modicon® B827-032, 20 to 28Vdc, 32-pt input module to a ControLogix 1756-IB32, 10 to 31.2Vdc, 32-pt input module. The conversion module provides the mating connections to the B827-032 swing-arm (terminal block) with the attached field wires. It routes those signals, via its 40-pin connector and a 1492-CABLE^①Z pre-wired cable to compatible terminals of the 1756-IB32 (refer to the Wiring Diagrams on page 2).

1492-CM800-LD010 Conversion Module

WARNING De-energize and lockout any and all power to all I/O field devices connected to the Modicon 800 I/O housing, and the power to the 800 I/O housing itself. Ensure all power is de-energized and locked out to any device in the control cabinet where the conversion is to be performed. Ensure work is performed by qualified personnel.

II. Module Installation

The 1492-CM800-LD010 conversion module must be installed in a 1492 conversion base-plate and cover-plate assembly. The installation of the module into the assembly is explained in the Installation Manual that ships with the conversion assembly. For a list of compatible assemblies refer to Appendix A.

III. Conversion Module Compatibility Matrix

Conversion Module	Compatible 800 Input Module	Compatible 1756 Input Module	Required 1492 Cable
1492-CM800-LD0010	B827-032	1756-IB32	1492-CABLE①Z

 \bigcirc This is the cable length in meters and tenths of meters (e.g. 015 = 1.5 meters). Recommended cable length is 003 (00.3 meters).

IV. Conversion Module Wiring Diagram

The following diagram shows the connections from the existing B827-032 swing-arm, through the conversion module, 1492 cable and to the 1756-IB32 input module. The diagram can be used as an aid in possible system troubleshooting.

WARNING There are several key application considerations and system specifications (bottom of drawing) when using these components (conversion module, cable and output module). Read and understand these considerations before installation.

Conversion: B827-032 to 1756-IB32 with 1492-CM800-LD010

B827-032 Swing Arm — J

Conversion Module Installation and Application Considerations

① The input delay times for the B827-032 module versus 1756-IB32 module are as follows:

1756-IB32

a) Off-to-On Delay 0.4ms

0 38me (nlue salac

0.38ms (plus selectable filter)

b) On-to-Off Delay 1ms

0.42ms (plus selectable filter)

 \oslash The B827-032 modules provided a fuse for input power. The 1756-IB32 is NOT fused.

③ Refer to your B827-032 and 1756-IB32 Installation Manual wiring schematics and diagrams for more details.

V. 1492-CM800-LD010 Conversion Module Specifications

(Operating specifications are when installed in the Conversion System base / cover-plate assembly)

Specification	Value		
Dimensions	288.9 mm (height) x 139.7 mm (depth) x 44.5 mm (width)		
	11.37 in. (height) x 5.5 in. (depth) x 1.75 in. (width)		
Approximate Shipping Weight	300g (0.66 lbs) (includes carton)		
Storage Temperature	-40 to +85°C (-40 to +185°F)		
Operating Temperature	0 to 55°C (32 to 131°F)		
Operating Humidity	5 to 95% at 55°C (non-condensing)		
Shock			
Non-operating	50g		
Operating	30g		
Operating Vibration	2g @ 10-500Hz		
Maximum Operating Voltage	150 Vdc		
Max. Module Operating Current			
Per Point:	2 Amps (1492-CABLE connection pins are limited to 2A per pin)		
Per Module:	12 Amps		
	NOTICE Refer to the Wiring Diagram(s) for		
	current limits for a specific configuration.		
Agency Certifications			
	UL Classified: Under UL File Number E113724		
	CSA		
	CE: compliant for all applicable directives		
Pollution Degree	2		
Environmental Rating	IP20		

VI. Appendix A - 800 Housing to 1756 Chassis Conversion System Selection Process

- 1) Determine the number of 800 I/O modules actually used in the 800 I/O Housing to be converted to 1756 I/O.
- Review the data in Column 5 from the below table, and select a 1756 I/O Chassis which meets your conversion needs from Step 1. Ensure the information from the I/O Conversion module table is reviewed first since in some cases, two 1756 modules are needed to replace one 800 I/O module.

1	2	3	4	5	6	7
Modicon 800 I/O Housing Cat Number	Max. Number of 800 Housing Slots for I/O	800 Housing Width Dimension	1756 I/O Chassis Catalog Number	Max. Number of 1756 Chassis Slots for I/O ①		Conversion Assembly Catalog Number 2
AS-H810-xxx	3	10.25"	1756-A4	3	10.25"	1492-MUA4-MB3
AS-H819-103	4	17.5"		A7 = 6, A10=9	A7 = 14.49" ④ A10 = 19.02"	
AS-H819-209	6	17.5"	1756-A7 or 1756-A10	A7 = 6, A10=9	A7 = 14.49" ④ A10 = 19.02"	1492-MUA7-A10- MB4679
AS-H819-100	7	17.5"		A7 = 6, A10=9	A7 = 14.49" ④ A10 = 19.02"	
AS-H827-103	8	27.1"		A10 = 9, A13=12	A10 = 19.02" A13 = 23.15"	
AS-H827-209	10	27.1"	1756-A10 or 1756-A13	A10 = 9, A13=12	A10 = 19.02" A13 = 23.15"	1492-MUA10-A13- MB81011
AS-B827-100	11	27.1"		A10 = 9, A13=12	A10 = 19.02" A13 = 23.15"	

3) Once the 1756 Chassis is selected, refer to Column 7 and select the Conversion Assembly.

① One chassis slot required for the ControlLogix processor or a remote I/O adapter type module.

② The footprint and mounting dimensions of the 1492 Conversion Assembly (base plate and cover plate) match those of the Modicon I/O Housing.

③ Width dimension includes the 1756 Chassis power supply.

@ Surplus Chassis width as compared to the 800 I/O Housing is divided equally when mounting it on the Conversion Assembly.

© Mounting holes for the 1756 I/O Chassis are pre-drilled and pre-tapped into the Conversion Assembly cover plate.
