

Summary of Changes

This publication contains the following new or updated information. This list includes substantive updates only and is not intended to reflect all changes.

Topic	Page
Updated the Additional Resources table to include the new PowerFlex® 755TM Non-Regenerative Supply (NRS) publication.	2
Added the Power Module Density section.	2
Updated the Corrosive Atmosphere specification in the Environmental Specifications table.	2
Added the new control transformer kit to the IP00 Kit Temperature Specifications table.	3
Added the new UL Listed Accessories table.	3
Updated the DC Bus Conditioner connections table for NRS connections.	6
Add the DC Bus Conditioner Connection Diagram (NRS).	6
Updated the Control Bus Assembly Ratings table for the NRS.	8
Updated the Control Bus Splice Ratings table for the NRS.	8
Updated the Control Bus Connector Ratings table for the NRS.	8
Updated the 20-750-MCTRLBUS-CONN1 connector table descriptions for the NRS.	9

Topic (continued)	Page
Added the Control Transformer with Fuse Holders and Fuses section.	10
Added the Non-Regenerative Supply Thermal Switch Interconnect Harness Kits section.	10
Added the new Wire Entry Bay Kits section.	11
Updated the DC Voltage Balance Bay (Back-to-Back Configuration) DC Bus Splice Kit table for the NRS.	14
Updated the AC Bus Bar Assemblies (Frames 8...15) table for the NRS.	15
Updated the DC Bus Bar Assemblies (Frames 8...15, NRS) table for the NRS.	17
Updated the Stab Receptacle Assemblies and Stab Receptacles with Back Panel and Bus Bars table for the NRS.	17
Add the contents for the movable L-bracket kit (catalog number 20-750-MLBRKT-F8M).	19
Updated the Bus Bar and Back Panel and Stab Receptacle Assembly Kits Suitable for Power Connections table for the NRS.	19
Updated the Approximate Weights table for the NRS.	20

Additional Resources

These documents contain additional information concerning related products from Rockwell Automation.

Resource	Description
PowerFlex® 755TM IP00 Open Type Kits Technical Data, publication 750-TD101 PowerFlex 750-Series Products with TotalFORCE™ Control Technical Data, publication 750-TD100	Provides detailed information on: <ul style="list-style-type: none"> • Kit selection • Kit ratings and specifications • Option specifications

Product Certifications website, rok.auto/certifications	Provides declarations of conformity, certificates, and other certification details.

You can view or download publications at [rok.auto/literature](#).

Qualified Personnel

ATTENTION: Only qualified personnel familiar with adjustable frequency AC drives and associated machinery should plan or implement the installation, start up, and subsequent maintenance of the system. Failure to comply can result in personal injury and/or equipment damage.

Accessible Parts

ATTENTION: To avoid an electric shock hazard, the installer must provide guarding to shield exposed electrical equipment against accidental contact. Exposed electrical components that carry potentially hazardous voltages are identified in the PowerFlex 750-Series Product with TotalFORCE Control Hardware Service Manual, publication [750-TG100](#). When installing this equipment, consider the design and placement of guarding to help prevent personal injury or equipment damage.

Product Safety

ATTENTION: Incorrectly applied or installed accessories can result in component damage or a reduction in product life. Wiring or application errors such as under sizing the motor, incorrect or inadequate AC supply, or excessive surrounding-air temperatures can result in malfunction of the system.

ATTENTION: This drive contains electrostatic discharge (ESD) sensitive parts and assemblies. Static control precautions are required when you install, test, service, or repair this assembly. Component damage may result if ESD control procedures are not followed. If you are not familiar with static control procedures, reference Guarding Against Electrostatic Damage, publication [8000-4.5.2](#) or any other applicable ESD protection handbook.

Equivalent Frame Size

PowerFlex 755T products are assigned frame size designators. The designations represent the various configurations of IP00 kits and hardware components that are packaged in a specific manner to obtain the full range of product offerings and power ratings. For an explanation of how frame sizes are determined for your product, see PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#).

Power Module Density

PowerFlex 755TM Non-Regenerative Supply (NRS) modules are assigned single density (1X) or dual density (2X) designators. "Single density" and "dual density" refers to the power output capability of the available NRS modules. Dual density modules support twice the power output of a single density module and standard PowerFlex 755TM power module with the same physical module size. See the PowerFlex 755TM Non-Regenerative Supply User Manual, [750-UM100](#), for details.

Environmental Specifications

This section describes environmental specifications. For complete product specifications and derating guidelines, see the PowerFlex 755TM IP00 Open Type Kits Technical Data, publication [750-TD101](#).

Category	Specification
Relative humidity	5...95% non-condensing
Storage temperature	-40...+70 °C (-40...+158 °F)
Pollution degree	Accessory kits are designed to meet Pollution Degree 2 per UL61800-5-1.
Corrosive Atmosphere	Severity Level GX per ANSI/ISA 71.03-2013, Airborne contaminants-gases. Severity level GX is defined as up to 2100 angstroms of film growth per 30 days of copper or silver reactivity. Severity Level CX per IEC 60721-3-3: 2019, Chemically Active Substances. For the product to meet the corrosive atmosphere rating, these conditions must be met: <ul style="list-style-type: none"> • Protective covers must remain installed in unused connectors during storage and operation. • The product or kit must be stored in the original packaging.
<ul style="list-style-type: none"> • ASTM B845-97 Method K Accelerated Test (30-day exposure) • Rockwell Automation proprietary accelerated corrosion test for industries with sources of gaseous sulfur compounds, including tire and rubber 	

IP00 Open Type Kits with XT Designation

All PowerFlex 755TM IP00 Open Type kits with corrosive gas protection (XT) meet the corrosive atmosphere specification as defined by Rockwell Automation (see Corrosive Atmosphere in the Environmental Specifications section on page 2).

The IP00 Open Type kits that are listed in this table do not meet the corrosive atmosphere specification. Do not install these kits in a PowerFlex 755T product installed in a corrosive environment. The kit catalog number and series are contained on the kit package label and/or nameplate.

Cat. No.	Module	Series	
20-750-MACPC1-xx or 20-750-MACPC1-xx-F7M	AC precharge control board	A	
20-750-MFTB1-F8	Fiber transceiver board		
20-750-MDCBUS-COND	DC bus conditioner (frames 8...15)		
20-750-MDCBUS1-COND	DC bus conditioner (frames 8...12, marine)		
20-750-MDCBUS-COND-F7M	DC bus conditioner (frame 7)		
20-750-MBSCD-DB	Marine discharge board (frame 7)		
20-750-MEMCC2-F8910	EMC C2 Filter, IP00, Frame 8...10		
20-750-MVENTC1-F11M	Input bay vent kit		
20-750-MTAM1-xx	Torque accuracy module		B and earlier

IMPORTANT For IP00 Open Type kits installed in an environment that contains volatile, conductive, or corrosive liquid, gases, and/or solids these conditions must be met:

- Kits must be installed in enclosures that provide for protection against solid and liquid ingress (IP21 / Type 1 or IP54 / Type 12)
- Kits must have corrosive gas protection (XT)
- Protective covers must be installed on unused connections

For IP00 Open Type kits that are stored before installation these conditions must be met:

- Kits must remain in the original packaging until the time of installation
- Kits must be stored in an area where exposure to corrosive atmosphere and humidity is minimized
- Kits must not be stored in environments that contain conductive pollutants

See the Industry Installation Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-AT003](#) for more information on environmental considerations.

IP00 Kit Temperature Specifications

This table provides the maximum surrounding air temperature specifications for the applicable IP00 kits. All kits that are listed in this table must be installed in a user-supplied, appropriately rated enclosure. Installation guidelines and procedures for IP00 / Open Type kits are in the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#).

Cat. No.	Accessory	Maximum Surrounding Temperature °C (°F)
20-750-MACPC1-xx or 20-750-MACPC1-xx-F7M	AC precharge control board	65 (149)
20-750-MACPR-xx-FnnM or 20-750-MACPR-xx-F7M	AC precharge resistor bank	75 (167)
20-750-MACP-xx-TVSS	AC precharge TVSS module	65 (149)
20-750-MN-XMFRn-xx, 20-750-MN-XMFR2-x	Control transformer, fuse holders, and fuses	70 (158)
20-750-MFTB1-F8	Fiber transceiver board	65 (149)
20-750-MDCBUS-COND	DC bus conditioner (frames 8...15)	75 (167)
20-750-MDCBUS1-COND	DC bus conditioner (frames 8...12, marine)	75 (167)
20-750-MDCBUS-COND-F7M	DC bus conditioner (frame 7)	75 (167)
20-750-MEMCC2-F8910	EMC C2 Filter, IP00, Frame 8...10	50 (122) ⁽¹⁾
20-750-MTAM1-xx	Torque accuracy module	65 (149)

(1) 40 °C (104 °F) max. ambient temp when installed in the 800 mm wide option bay (cat. no. 20-750-MPBAY-800).

UL Listed Accessories

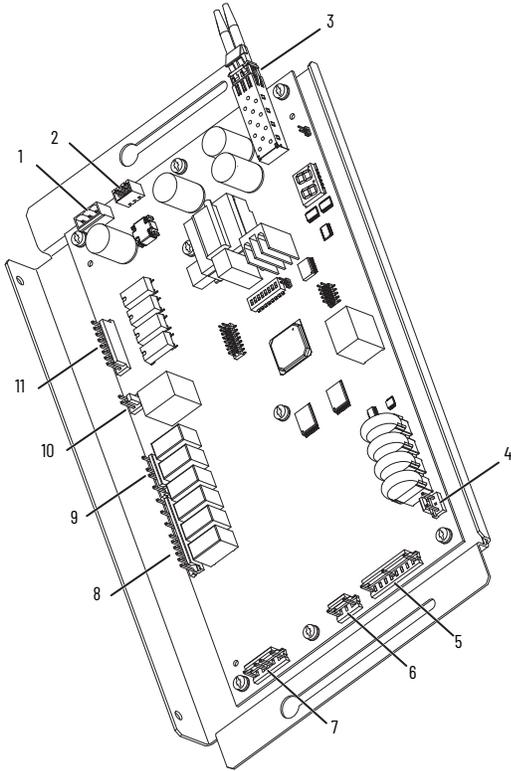

This section lists the IP00 Open Type kits contained in this publication that are UL listed. All other IP00 Open Type kits listed in this publication are not UL listed. For details about how to install the accessories included in this publication, see the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#).

Cat. No.	Description
20-750-MACPC1-xx and 20-750-MACPC1-xx-F7M	AC precharge control board
20-750-MACPR-xx-FnnM and 20-750-MACPR-xx-F7M	AC precharge resistor bank
20-750-MACP-xx-TVSS	AC precharge TVSS module
20-750-MDCBUS-COND, 20-750-MDCBUS1-COND, and 20-750-MDCBUS-COND-F7M	DC bus conditioner
20-750-MBSCD-DB	Marine discharge circuit board
20-750-MTAM1-xx	Torque accuracy module
20-750-MFTB1-F8.	Fiber transceiver circuit board
20-750-MCBUS1-xx-FnnM and 20-750-MCBUS1-xx-F10M	Control bus assembly
20-750-MCTRLBUS-SPL	Control bus splice
20-750-MCTRLBUS-CONNn	Control bus connectors
20-750-MN-XMFRn-xx	Control transformers, fuse holders, and fuses
20-750-MACBUS6-nKn, 20-750-MACBUS8-nKn, 20-750-MACBUSnn-nKn, 20-750-MCNCTAC-Fn, 20-750-MTEBUSn-nKn, 20-750-MACIOT-F7M, 20-750-MACINP-F7, 20-750-MSOF-F7	AC input/output bus bars
20-750-MACLn-FnM, 20-750-MACL2-xx-F7M, 20-750-MACL2-xx-F7M	AC input/output link bus bar and fuse assembly
20-750-MCBBUSn-nKn, 20-750-MPCCB-F7M	AC precharge circuit breaker bus bars
20-750-MDCFB-xx-F7M	DC output flex bus bar and fuse assembly
20-750-MACSPL1-FnnM, 20-750-MACSPLn-FnM, 20-750-MACSPL2-nKn, 20-750-MTESPLn-FnM	AC bus bar splices
20-750-MDCBUSn-nKn, 20-750-MDCBUSnn-nKn, 20-750-MDCOT-F7M, 20-750-MDRFB-F7M,	DC input/output bus bars
20-750-MDCSPL1-nKn, 20-750-DCVBB-SPLICE	DC bus splices
20-750-MGNDSP1	Ground bus splice
20-750-DCVBB-400, 20-750-DCVBB-400C, 20-750-DCVBB-400-FBR, 20-750-DCVBB-800, 20-750-DCVBB-800-FBR, 20-750-DCVBB-BS	DC voltage balance / wire bays (back-to-back configurations)
20-750-MLBRKT-F8M	Input/output power cable L bracket
20-750-MNIHn, 20-750-MNIH-JMPn	Interconnect wire harness and interconnect jumper
20-750-MACRn-FnM, 20-750-MADRn-FnM, 20-750-MDCREC1-F8M, 20-750-MDCREC1-F8MC, 20-750-MREC1-F8M, 20-750-MREC1-F8MC, 20-750-MIRn-FnM, 20-750-MIRn-FnnM, 20-750-MNIRn	Stab receptacle assemblies and stab receptacle assemblies with back panel and bus bars
20-750-MVENTn-FnM, 20-750-MVENTn-FnnM, 20-750-MVENTC2-F8M, and 20-750-MVENTC2-F11M	Ventilation kits (that contain fans)
20-750-MEMCC2-F8910, 20-750-MEMCC2-IPBB, 20-750-MEMCC2-Fn, 20-750-MEMCC2-F10	EMC C2 filter
20-750-MOSHPD-FnM, 20-750-MOSHPD-FnnM	Seismic-qualified installation kits

AC Precharge Control Board

The AC precharge control board is installed, with all interconnection wire harnesses, in the frame 8 and 9 AC precharge modules (cat. no. 20-750-MACP-CD-F8M, 20-750-MACP-x-F8M, 20-750-MACP-CD-F9M, 20-750-MACP-x-F9M). For frames 7 and 10...15, the AC precharge control circuit board kit excludes the wire harnesses and fiber-optic cable that are required for connections to other IP00 kits and components that are used in an AC precharge circuit and must be customer-sourced. See the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication 750-IN101, for details.

IMPORTANT Do not remove protective covers from wire harnesses, circuit board connectors, terminal blocks, and fiber-optic ports unless used at the time of installation. Removing a protective cover can lead to contamination.

Protective connection covers not shown for clarity only.

No.	Name	Description
1	J1	Required, internal 24V DC, 1.5 A power supply from connector P2
2	J12	Optional 24V DC, 1.5 A power supply
3	ACP	Fiber transceiver port for fiber-optic connection ACP0 on the fiber transceiver board in the control pod
4	J8	Chassis MOV jumper (PE-A)
5	J6	R, S, and T signals from fused disconnect (FD1)
6	J7	DC bus feedback signals
7	J5	Customer-supplied 240V AC, 1.2 A power source
8	J4	240V AC power to motor operator and circuit breaker close, shunt release, and AC precharge coils
9	J3	240V AC power to circuit breaker trip release and time delay relay
10	J11	TVSS module status from connector P15
11	J2	Status signals from the circuit breaker, fused disconnect, and AC precharge contactor

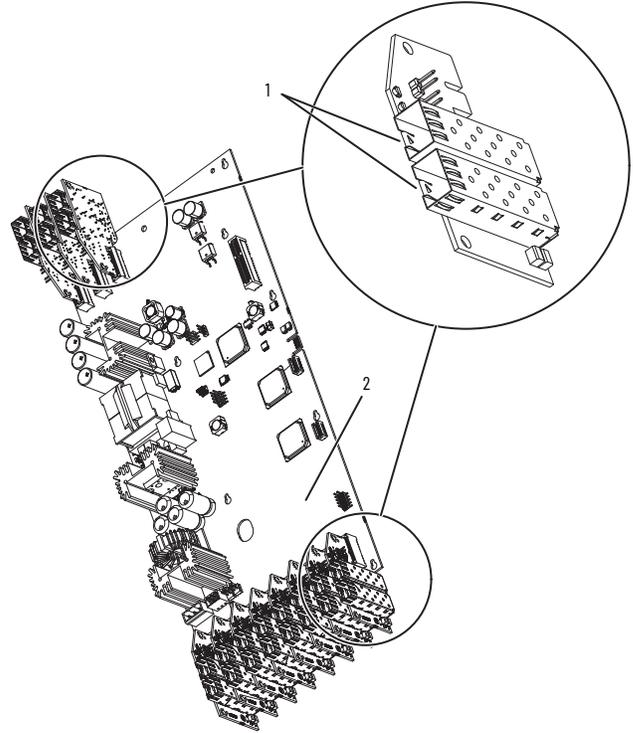

AC Precharge Control Board Ratings

Cat. No.	Rated Voltage	Frame
20-750-MACPC1-CD-F7M	400/480	7
20-750-MACPC1-EF-F7M	600/690	7
20-750-MACPC1-CD	400/480	8...15
20-750-MACPC1-EF	600/690	8...15

Fiber Transceiver Board

The fiber transceiver boards are installed on the fiber interface board in the control pod and contain the fiber-optic connections described here. See the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication 750-IN101, for installation instructions.

IMPORTANT Do not remove protective covers from wire harnesses, circuit board connectors, terminal blocks, and fiber-optic ports unless used at the time of installation. Removing a protective cover can lead to contamination.

Protective connection covers not shown for clarity only.

No.	Frame 7 Name	Frame 8...15 Name	Description
1	ACPC	ACP0	Fiber transceiver port for fiber-optic connection with AC precharge control board
	TAM	ACP1 / TAM	Fiber transceiver port for fiber-optic connection with torque accuracy module
	LO	LO...L9	Fiber transceiver port for fiber-optic connection with power modules used as line side converters
2	MO	MO...M9	Fiber transceiver port for fiber-optic connection with power modules used as motor side inverters
	-	-	Fiber interface board

Fiber Transceiver Board Ratings

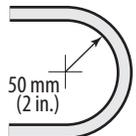

Catalog Number	Voltage
20-750-MFTB1-F8	400/480/600/690

ATTENTION: A hazard of permanent eye damage exists when using optical transmission equipment. This product emits intense light and invisible radiation. Do not look into module ports or fiber-optic cable connectors.

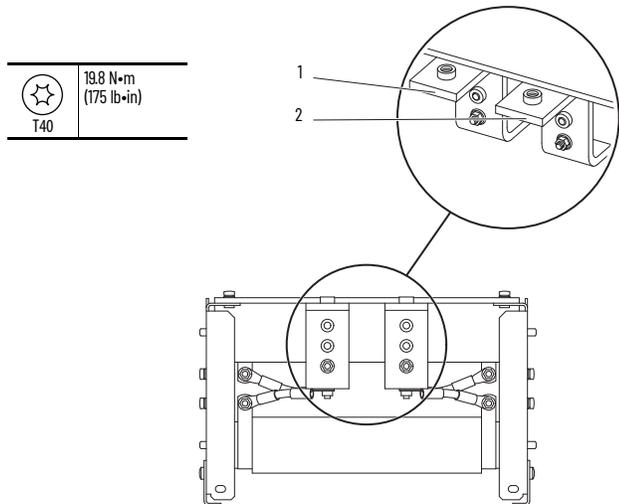

To install the fiber-optic connector, remove the transceiver cartridge from the cage, insert the fiber-optic cable into the transceiver, and insert the transceiver and fiber-optic cable into the cage until you hear a audible 'click.'

IMPORTANT Minimum inside bend radius for fiber-optic cable is 50 mm (2 in.). Any bends with a shorter inside radius can permanently damage the fiber-optic cable. Signal attenuation increases as inside bend radius is decreased.

AC Precharge Resistor Bank (Frames 10...15)

The AC precharge resistor bank contains the following connections. See Resistor Bank Mounting Instructions (Frames 10...15) on page 20 for mounting instructions.

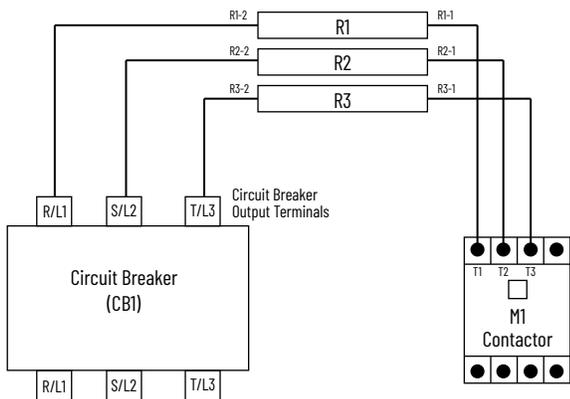

No.	Name	Description	Recommended Conductor Cross Section		Terminal Specification mm (in.)
			ISO (mm ²)	AWG	
1	Left terminal	Resistor bank terminal R1-1 to motor contactor terminal L1	42.4	1	Pad Area: 38.1 (1.5) x 50 (2)
		Resistor bank terminal R2-1 to motor contactor terminal L2			
		Resistor bank terminal R3-1 to motor contactor terminal L3			
2	Right terminal	Resistor bank terminal R1-2 to circuit breaker output terminal R/ L1	42.4	1	
		Resistor bank terminal R2-2 to circuit breaker output terminal S/ L2			
		Resistor bank terminal R3-2 to circuit breaker output terminal T/ L3			

AC Precharge Resistor Bank Ratings (Frames 10...15)

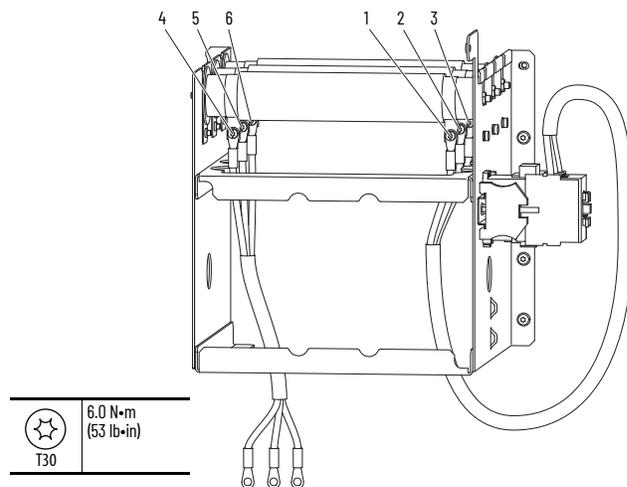

Cat. No.	Resistance (Ohms)	Frame
20-750-MACPR-CD-F10M	0.83	10, 13
20-750-MACPR-CD-F11M	0.2	11, 14
20-750-MACPR-CD-F12M	0.16	12, 15
20-750-MACPR-EF-F10M	1.5	10, 13
20-750-MACPR-EF-F11M	0.37	11, 14
20-750-MACPR-EF-F12M	0.3	12, 15

AC Precharge Resistor Bank (Frame 10...15) Connection Diagram

AC Precharge Resistor Bank (Frame 7)

The AC precharge resistor bank contains the following connections. See Resistor Bank Mounting Instructions (Frame 7) on page 20 for installation instructions. The mounting panel, wire harnesses, and other components shown here are not included in the kit and must be customer-supplied.

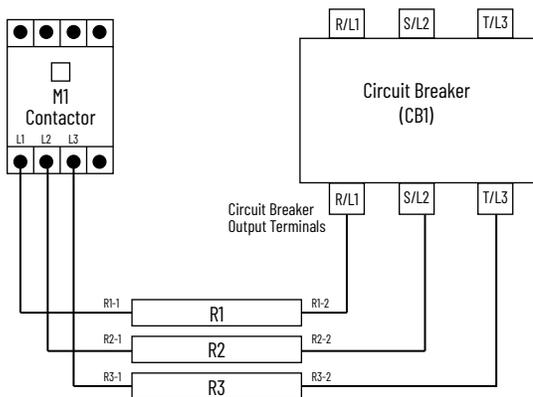

No.	Connection	Description	Recommended Conductor Cross Section	
			ISO (mm ²)	AWG
1	R1-1	Resistor bank terminal R1-1 to precharge contactor terminal L1	8.36	8
2	R2-1	Resistor bank terminal R2-1 to precharge contactor terminal L2		
3	R3-1	Resistor bank terminal R3-1 to precharge contactor terminal L3		
4	R1-2	Resistor bank terminal R1-2 to circuit breaker output terminal R/L1		
5	R2-2	Resistor bank terminal R2-2 to circuit breaker output terminal S/L2		
6	R3-2	Resistor bank terminal R3-2 to circuit breaker output terminal T/L3		

AC Precharge Resistor Bank Ratings (Frame 7)

Cat. No.	Resistance (Ohms)
20-750-MACPR-CD-F7M	0.83
20-750-MCAPR-EF-F7M	1.5

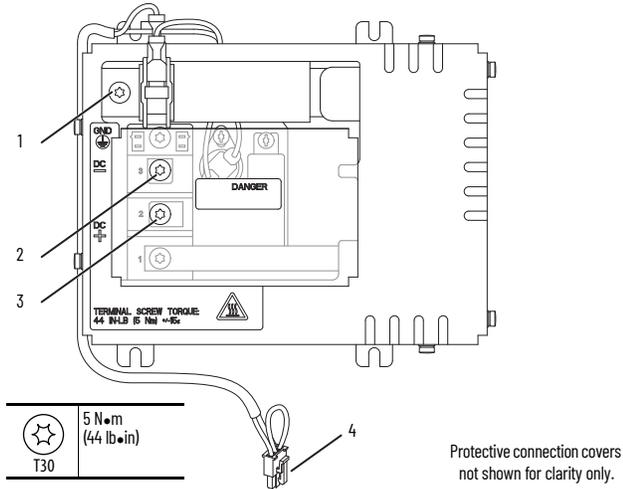

AC Precharge Resistor Bank (Frame 7) Connection Diagram

DC Bus Conditioner (Frames 8...15)

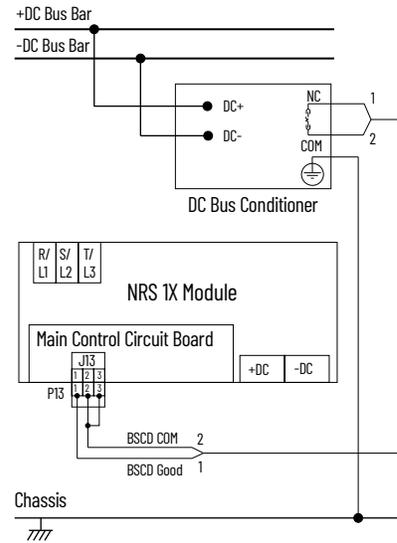

The DC bus conditioner contains the following connections. -DC and +DC bus connections must be as short as possible.

IMPORTANT Do not remove protective covers from wire harnesses, circuit board connectors, terminal blocks, and fiber-optic ports unless used at the time of installation. Removing a protective cover can lead to contamination.

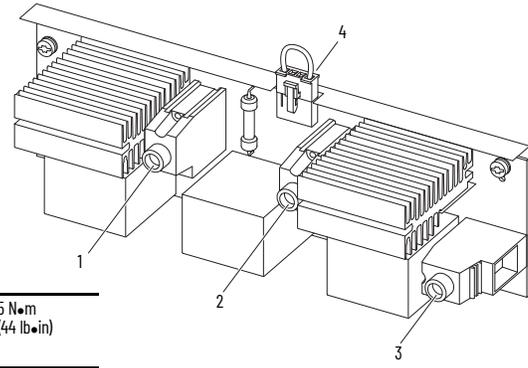

DC Bus Conditioner Connection Diagram (NRS)

NRS 1X Module Shown. Connections are the Same for NRS 2X Modules.

DC Bus Conditioner (Frame 7)

The DC bus conditioner contains the following connections.

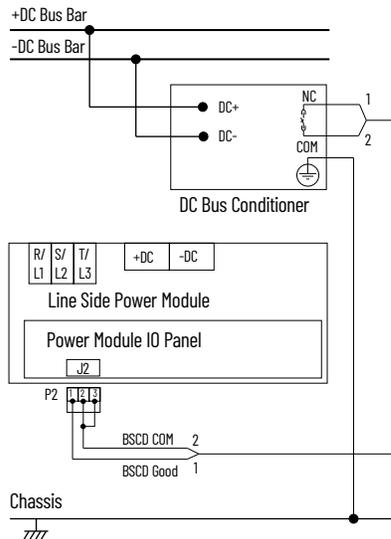

No.	Name	Description	Terminal Torque N·m (lb·in)	Conductor Cross Section	
				ISO (mm ²)	AWG
1	GND	Connection to PE ground	5 (44)	13.3	6
2	- DC	Connects to -DC bus		13.3	6
3	+ DC	Connects to +DC bus		13.3	6
4	P2	DC bus conditioner status signal connection to J2 on the power module I/O board	-	-	-
	P13	DC bus conditioner status signal connection to J13 on the NRS module main control board	-	-	-

DC Bus Conditioner Ratings (Frames 8...12)

Cat. No.	DC Input Voltage	Amps ⁽¹⁾	Frame	Use w/NRS
20-750-MDCBUS-COND	1000	100	8...15	Yes
20-750-MDCBUS1-COND (for marine applications)	1000	100	8...12	Yes

(1) This kit contains internal fusing that limits fault current to 100 A (Mersen semiconductor protection fuse, catalog number A100P100-4TA).

DC Bus Conditioner Connection Diagram (Frames 8...15)

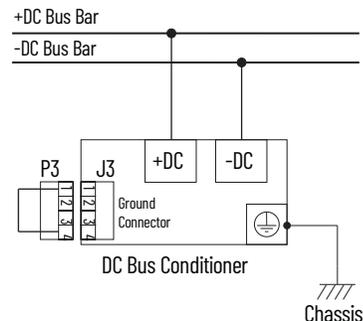

No.	Name	Description	Terminal Torque N·m (lb·in)	Conductor Cross Section	
				ISO (mm ²)	AWG
1	- DC	Connects to -DC bus	5 (44)	10	8
2	+ DC	Connects to +DC bus		10	8
3	GND	Connection to PE ground		10	8
4	P3	Ground jumper (DR). Connected by default. Disconnect for marine applications.	-	-	-

DC Bus Conditioner Ratings (Frame 7)

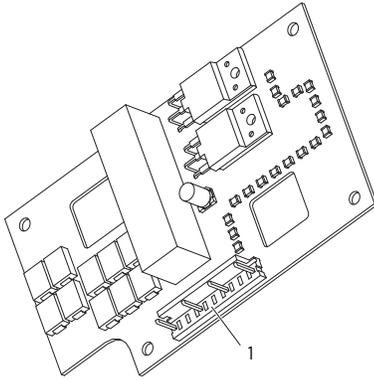

Cat. No.	DC Input Voltage	Amps
20-750-MDCBUS-COND-F7M	1000	70

DC Bus Conditioner (Frame 7) Connection Diagram

Marine Discharge Circuit Board (Frame 7)

The marine discharge circuit board contains the following connections. The marine discharge circuit board kit excludes the wire harness that is required for connection to the DC bus bars and chassis ground and must be customer-sourced. See the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#), for details.

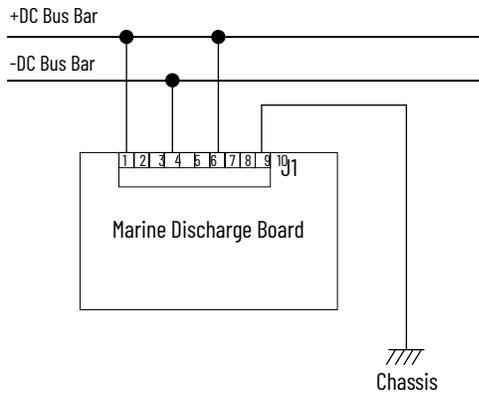

No.	Name	Description
1	J1	Connects to +DC and -DC bus bars and PE ground on chassis.

Marine Discharge Board (Frame 7) Rating

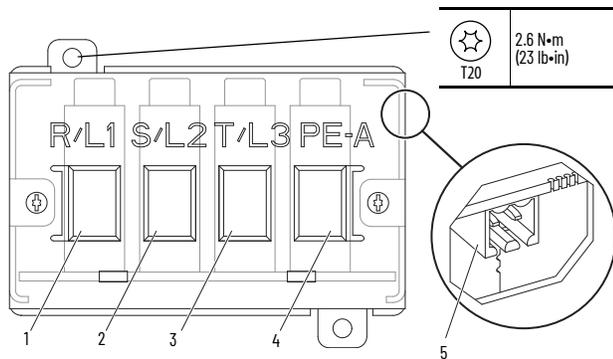

Cat. No.	DC Input Voltage

Marine Discharge Board (Frame 7) Connection Diagram

AC Precharge TVSS Module

The TVSS module contains the following connections.

No.	Name	Description
1	R/L1	Connection to circuit breaker output terminal CB1-R/L1
2	S/L2	Connection to circuit breaker output terminal CB1-S/L2
3	T/L3	Connection to circuit breaker output terminal CB1-T/L3
4	PE-A1	Power jumper PE-A2
5	P15	TVSS status signal connection to J11 on the AC precharge control board

AC Precharge TVSS Module Wire Specifications

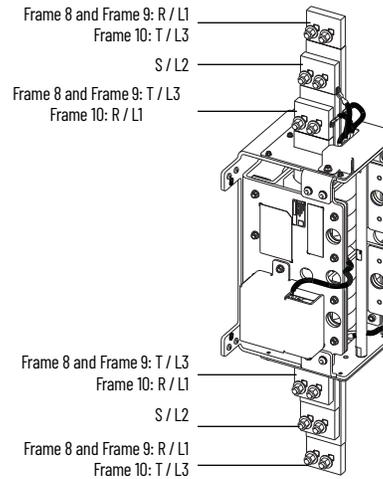

Conductor Cross Section		Recommended Terminal Torque N·m (lb·in)	Strip Length mm (in.)
ISO (mm ²)	AWG		
0.5 ...35.0	20 ...1	2.5 (22)	15 (0.6)

AC Precharge TVSS Module Ratings

Cat. No.	Voltage	Frame
20-750-MACP-CD-TVSS	400/480	7...15
20-750-MACP-EF-TVSS	600/690	7...15

EMC C2 Filter

The EMC C2 filter kit is used for PowerFlex 755T product installations that require compliance with CE EN61800-3 Category C2 for conducted emissions only. To meet compliance, all EMC C2 filter kits that are listed in this publication (for the applicable equivalent frame size) must be installed in the recommended Rittal TS8 enclosure and connected to the appropriate PowerFlex 755T products. See Bus Bar Assemblies on page 15 for the required EMC C2 Filter bus bar kits. See Lift the EMC C2 Filter on page 7 for lifting instructions.

EMC C2 Filter Ratings

Cat. No.	Kit Description	Rated Voltage	Rated Amps
20-750-MEMCC2-F8910 ⁽¹⁾	EMC C2 Filter, IP00, Frame 8...10	400...690	2100

(1) This kit includes three ferrite cores and the hardware required for connecting to the EMC C2 bus bar kits used with the EMC C2 filter. See the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#), for instructions on where to install the ferrite cores.

Lift the EMC C2 Filter

ATTENTION: Follow these precautions to guard against possible personal injury and/or equipment damage when preparing to lift, transport, and install EMC C2 filters:

- Inspect all lifting hardware for proper attachment before lifting the filter.
- Do not allow any part of the filter or lifting mechanism to make contact with electrically charged conductors or components.
- Do not subject the filter to high rates of acceleration or deceleration while transporting to the installation location or while lifting.
- Do not allow personnel or their limbs directly underneath the filter when it is lifted and installed.

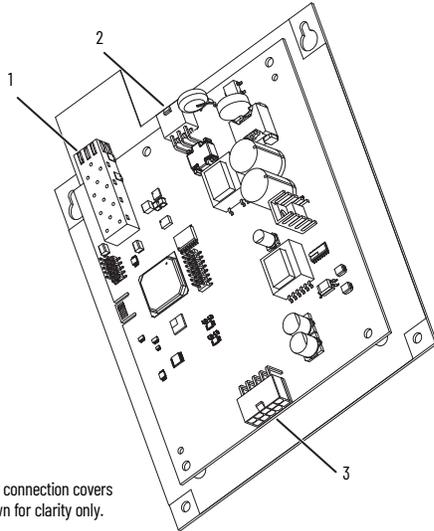

The EMC C2 filter weighs 31.75 kg (70 lb). For detailed instructions on how to unpack and lift the EMC C2 filter (cat. no. 20-750-MEMCC2-F8910) out of the shipping crate, see this publication that shipped with the filter kit:

- PowerFlex 755TM IP00 EMC C2 Filter Unpacking and Lifting Instructions, publication [750-IN109](#).

Torque Accuracy Module

The optional torque accuracy module contains the following connections (shown with cover removed).

IMPORTANT Do not remove protective covers from wire harnesses, circuit board connectors, terminal blocks, and fiber-optic ports unless used at the time of installation. Removing a protective cover can lead to contamination.

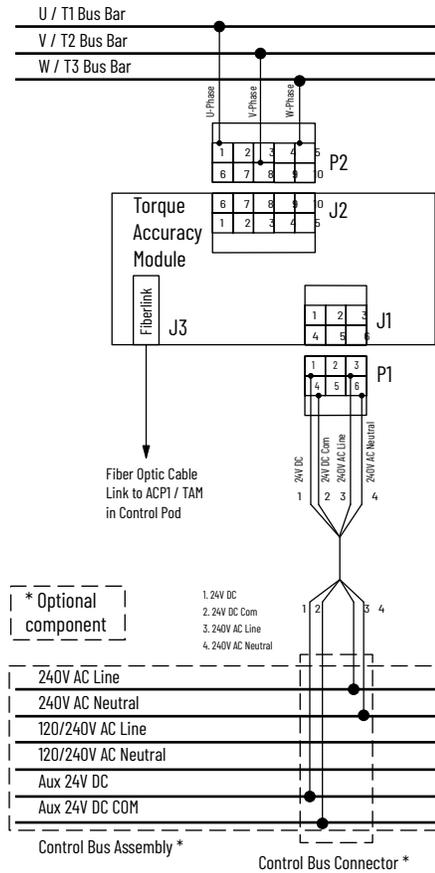

Protective connection covers not shown for clarity only.

No.	Name	Description
1	J3	Fiber transceiver port for fiber-optic connection ACP1/TAM on the fiber transceiver board in the control pod. This connection is at line voltage.  ATTENTION: A shock hazard exists on terminal J3. To avoid injury, do not remove the module cover.
2	J1	240V AC, 0.1 A and optional 24V DC, 0.5 A control power supply from the control bus connector P4 or customer-supplied source
3	J2	From the AC bus connections U/T1, V/T2, W/T3

Torque Accuracy Module Ratings

Cat. No.	Voltage
20-750-MTAM1-CD	400/480
20-750-MTAM1-EF	600/690

Control Bus

These tables list the available control bus assembly kits.

Control Bus Assembly Ratings⁽¹⁾

Cat. No.	Max. Voltage	Cabinet Width mm (in.)	Cabinet Type	Equivalent Frame Size	Used for NRS
20-750-MCBUS1-CB-F8M	240	300 (12)	Control bay	8...15	—
20-750-MCBUS1-IB-F8M	240	400 (16)	Input bay/ Wire bay	8...10	Yes
20-750-MCBUS1-PB-F8M	240	400 (16)	Power bay	8	Yes
20-750-MCBUS1-IB-F9M	240	600 (24)	Input bay	9	—
20-750-MCBUS1-PB-F9M	240	600 (24)	Power bay	9...15	Yes
20-750-MCBUS1-PB-F10M	240	800 (31)	Power bay	8...15	Yes
20-750-MCBUS1-IB-F10M	240	1000 (39)	Input bay	10...15	—

(1) If you use a control bus assembly kit, you must also use the control bus splice kit and a control bus connector kit listed in the following tables.

Control Bus Splice Ratings

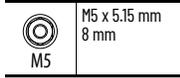

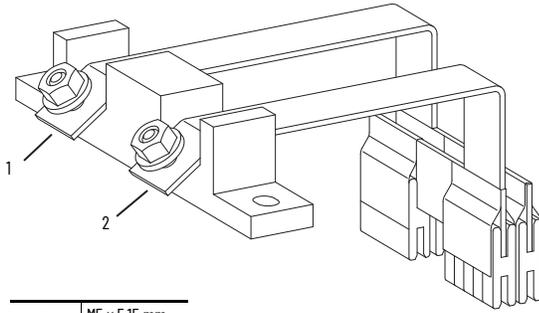

Cat. No.	Max. Voltage	Equivalent Frame Size	Used for NRS
20-750-MCTRLBUS-SPL	240	8...15	Yes

Control Bus Connector Ratings

Cat. No.	Max. Voltage	Equivalent Frame Size	Used for NRS
20-750-MCTRLBUS-CONN1	240	8...15	Yes
20-750-MCTRLBUS-CONN2	240	10...15	—

Control Bus Connector Details

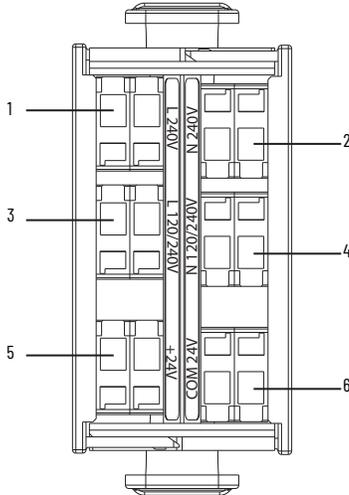

The control bus connector in 20-750-MCTRLBUS-CONN2 is required to connect a 240V AC power supply to the 1000 mm wide input bay control bus assembly kit, cat. no. 20-750-MCBUSI-IB-F10M. The connector in 20-750-MCTRLBUS-CONN2 uses the following connections.

No.	Position Name	Description	Conductor Cross Sections		Terminal Specifications mm ²	Torque N•m (lb•in)
			ISO (mm ²)	AWG		
1	240V L	240V AC line	(1)	(1)	Stud: M5 Pad Area: 19	4.8 (42)
2	240V N	240V AC neutral (connected to PE)				

(1) Size according to US NEC or applicable national or local codes.

The control bus connector in 20-750-MCTRLBUS-CONN1 uses the following tension clamp terminal connections.

No.	Name	Description	Conductor Cross Sections ⁽¹⁾		
			ISO (mm ²)	AWG	Strip Length mm (in.)
1	L 240V	240V AC line	0.2...2.5	26...14	7 (0.28)
2	N 240V	240V AC neutral	0.2...2.5	26...14	7 (0.28)
3	L 120V/240V	120/240V AC line ⁽²⁾	0.2...2.5	26...14	7 (0.28)
4	N 120V/240V	120/240V AC neutral ⁽²⁾	0.2...2.5	26...14	7 (0.28)
5	+24V	24V DC power	0.2...2.5	26...14	7 (0.28)
6	COM 24V	24V DC common	0.2...2.5	26...14	7 (0.28)

(1) Use minimum 90 °C (194 °F) insulation.

(2) Used for optional 240V AC only for the PowerFlex 755TM Non-Regenerative Supply.

Ventilation Kits (Frames 8...15)

This section describes ventilation kits for frames 8...15 PowerFlex 755T products.

Cat. No.	Cabinet Width mm (in.)	Cabinet Type	Enclosure Rating	Equivalent Frame Size
20-750-MVENT2-F8M ⁽¹⁾	400 (16)	Power bay	IP54, Type 12	8
20-750-MVENT2-F9M ⁽¹⁾	600 (24)	Power bay	IP54, Type 12	8...15
20-750-MVENT2-F10M ⁽¹⁾	800 (31)	Power bay	IP54, Type 12	8...15
20-750-MVENTC2-F8M	300 (12)	Control bay	IP54, Type 12	8...15
	400 (16)	Input bay	IP21, Type 1/ IP54, Type 12	8
	600 (24)	Input bay	IP21, Type 1/ IP54, Type 12	9
20-750-MVENTC1-F11M	1000 (39)	Input bay	IP21, Type 1	10...15
20-750-MVENTC2-F11M	1000 (39)	Input bay	IP54, Type 12	10...15

(1) These kits contain this fuse: Time Delay, 250V, 3.5 A Cartridge.

Ventilation Kit Temperature Specifications

This table provides the operating temperature limits for the IP00 ventilation kits that contain fans.

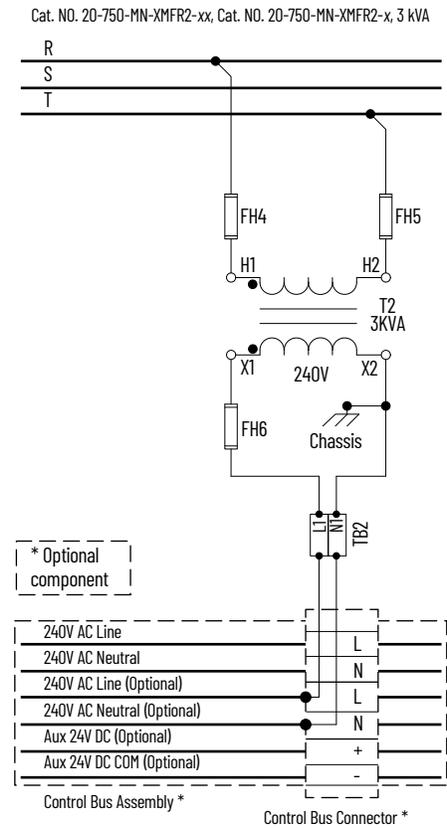

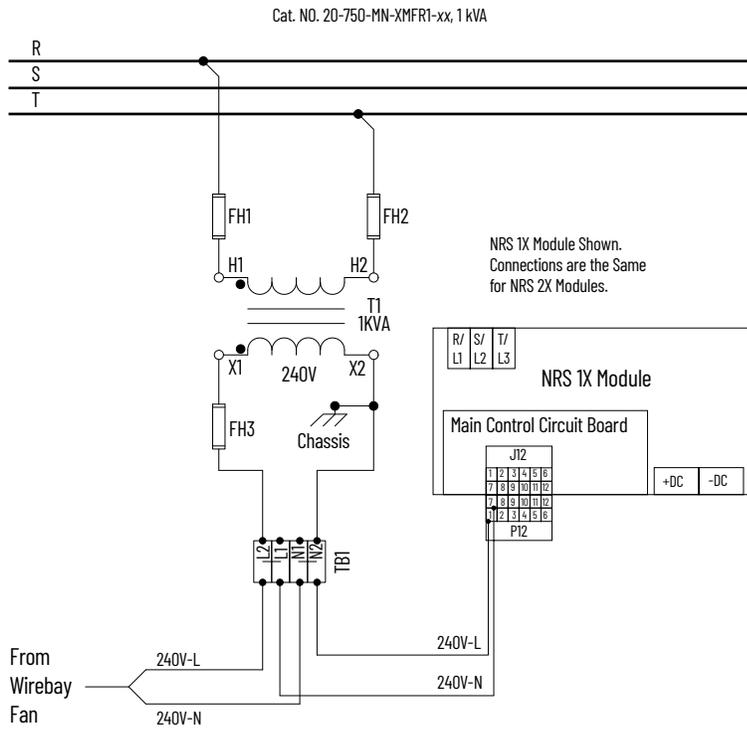

Cat. No.	Accessory	Cabinet Type	Inlet Temperature Range °C (°F)
20-750-MVENT2-F8M	Ventilation kit - roof fan (IP54, Type 12)	Power bay (400 mm)	-40...70 (-40...158)
20-750-MVENT2-F9M		Power bay (600 mm)	
20-750-MVENT2-F10M		Power bay (800 mm)	
20-750-MVENTC2-F8M	Ventilation kit - roof fan (IP21, Type 1 / IP54, Type 12)	Control bay and input bay (400 mm and 600 mm)	-25...80 (-13...176)
20-750-MVENTC1-F11M	Ventilation kit - door fans (IP21, Type 1)	Input bay (1000 mm)	-25...75 (-13...167)
20-750-MVENTC2-F11M	Ventilation kit - door fans (IP54, Type 12)	Input bay (1000 mm)	

Control Transformer with Fuse Holders and Fuses

This table contains the control transformers, fuse holders, and fuses used with NRS modules and wire bay fans and to provide optional 240V AC control power for NRS systems. All kits include mounting brackets, DIN rails and hardware, feed-through terminal blocks and interconnection wire harnesses. See Control Transformer Schematics for use in an NRS system.

Control Transformer Schematics

Non-Regenerative Supply Thermal Switch Interconnect Harness Kits

The interconnect wire harnesses are used to connect a thermal switch installed in an NRS wire bay to a NRS module when installed in an NRS power bay and connect parallel NRS modules.

Cat. No.	Description	From	Connector	To	Connector	Length mm (in.)
20-750-MNIH1	NRS module interconnect harness	Power bay	J25/J26	Power module	J12	925.0 (36.4)
20-750-MNIH2	Thermal switch signal interconnect harness for parallel NRS module, in-line configurations only.	Front wire bay	J28	Front power bay	J25	2000.0 (78.7)
		Front power bay	J25	Rear power bay	J25	
		Rear wire bay	J28	Rear power bay	J25	
20-750-MNIH3	Thermal switch signal interconnect harness for parallel NRS module, back-to-back configurations only.	Front wire bay	J28	Front power bay	J25	1450.0 (57.1)
		Front power bay	J25	Rear power bay	J25	
		Rear wire bay	J28	Rear power bay	J25	
20-750-MNIH-JMP1	NRS modules signal interconnect loop-back harness for last parallel NRS module.	-	-	Power bay	J26	-
20-750-MNIH-JMP2	NRS module signal interconnect harness for parallel NRS module configurations only.	Power bay	J26	Power bay	J25	370.0 (14.6)
20-750-MNIH-JMP3	Thermal switch signal interconnect harness for wire bay to first power bay.	Wire bay	J26	Power bay	J25	350.0 (13.8)

Wire Entry Bay Kits

These wire entry bay kits are used with PowerFlex 755T product and PowerFlex Non-Regenerative Supply (NRS) IP00 / Type 1 installations.

Wire Entry Bays

Cat. No.	Description	Product / Equivalent Frame Size	Used for NRS	Component	Qty	Cabinet Width mm (in.)	Voltage	Material	Thickness mm (in.)

				Control bus splice	1	—	240V (max.)	—	—
				Door fan and NRS wire harness	1	—	240 (max.)	—	—

(1) When the wire bay is used for PowerFlex 755TM frames 8...15 products, the 240V AC power wire harness for the door fan must be customer sourced. See the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#), for details.

PowerFlex 755TM DC Voltage Balance / Wiring Bay Kits

The DC voltage balance/wiring bay kits are required for power wire connections for PowerFlex 755TM frames 13...15 and NRS parallel configurations that support PowerFlex 755TM common bus inverter frame 13...15 installations.

Voltage Balance Bay / Wiring Bay Kits

DC Voltage Balance Bay (Back-to-Back Configuration) DC Bus Splice Kit ⁽¹⁾

Cat No.	Voltage	Material	Thickness mm (in.)	Frame Size	Used for NRS
20-750-DCVBB-SPLICE	400/480/600/690	Copper	19.05 (0.75)	13...15	Yes

(1) This IP00 kit is included with the applicable back-to-back DC voltage balance bay kits specified in the Voltage Balance Bay / Wiring Bay Kits table.

Seismic-qualified Installation Kits

Kits for seismic-qualified installations are available for use with the recommended Rittal TS8 enclosures listed here. See the PowerFlex 750-Series Products with TotalFORCE Control, Installation Instructions, publication [750-IN100](#), for details.

Cat. No.	Cabinet Types ⁽¹⁾	Equivalent Frame Size
20-750-MOSHDP-F8M	PowerFlex 755T Products, Input Bay, Power Bay, and Exit Wire Bay	8
20-750-MOSHDP-F9M	PowerFlex 755T Products, Input Bay, Power Bay, and Exit Wire Bay	9
20-750-MOSHDP-F10M	PowerFlex 755T Products, Entry Wire Bay, Input Bay, Power Bay, and Exit Wire Bay	10
20-750-MOSHDP-F11M	PowerFlex 755T Products, Entry Wire Bay, Input Bay, Power Bay, and Exit Wire Bay	11
20-750-MOSHDP-F12M	PowerFlex 755T Products, Entry Wire Bay, Input Bay, Power Bay, and Exit Wire Bay	12

(1) Each kit includes parts for the largest possible enclosure lineup for frame size. Therefore, in some cases, not all parts in the kit will be installed.

AC Bus Bar Assemblies (Frames 8...15)

This section provides information about AC bus bar, bus bar splice, and bus bar and fuse assembly kits.

Cat. No. ⁽¹⁾	Voltage	Cabinet Width mm (in.)	Cabinet Type	Material	Thickness mm (in.)	Equivalent Frame Size	Used for NRS
AC Input Bus Bar Kits							
20-750-MCNCTAC-F8	600/690	400 (16)	Input bay	Aluminum	12.7 (0.5)	8	–

(1) Not all of these assemblies are suitable for direct connections to power wiring. See [Power Cable Connections](#) for details.

(2) This measurement reflects a wire size.

(3) To meet EMC C2 compliance for conducted emissions, the plastic airflow baffle and ground cable (included with this kit) and the frame 8 AC input bus bar assembly (cat. no. 20-750-MCNCTAC-F8) must be installed with this kit.

(4) To meet EMC C2 compliance for conducted emissions, the plastic airflow baffle and ground cable (included with this kit) and the frame 9 AC input bus bar assembly (cat. no. 20-750-MCNCTAC-F9) must be installed with this kit.

(5) To meet EMC C2 compliance for conducted emissions, the ground bus splice (included with this kit) and the frame 10...12, 1000 mm wide AC input bus bars (cat. no. 20-750-MACBUS10-3K0 or 20-750-MACBUS10-4K7) must be installed with this kit.

(6) This kit includes a ground bus bar that must be installed in the wire bay to meet EMC C2 compliance for conducted emissions.

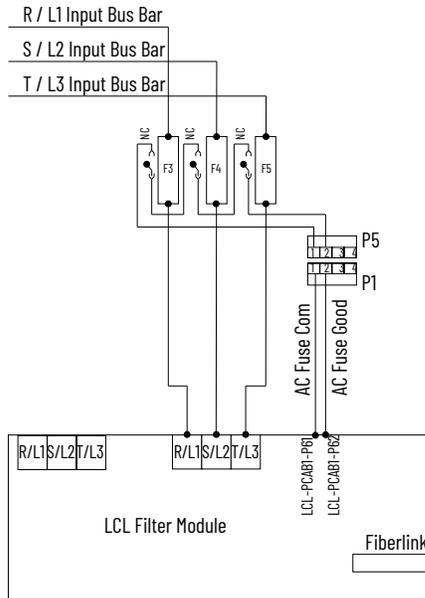

AC Input Link Bus Bar and Fuse Assembly Kit Fuses (Frames 8...15)

The AC input link bus bar and fuse assembly kits contain fuses that, when used with an LCL filter module (catalog numbers 20-750-ML1-xnnnxxx), provide short circuit protection.

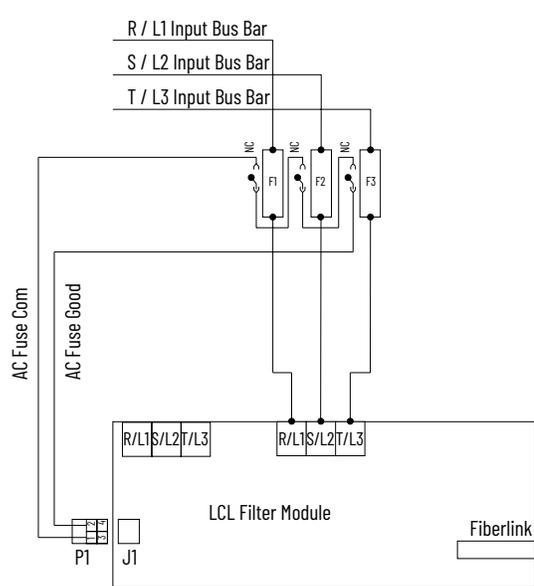

Bus Bar Assembly and Fuse Kit Cat. No.	Frame	LCL Filter Module ⁽¹⁾	Voltage Rating	Bussman Fuse Number	Fuse Rating	Kit Fuse Qty.
20-750-MACL1-F8M	8	One 20-750-ML1-C540D505	400/480	170M6463	690/700V (IEC/U.L.), 900 A ⁽²⁾	3

- (1) For right-to-left orientation.
 (2) Use this kit only when an exit wire bay is not used.
 (3) This catalog number must be used for frames 10, 12, 13, and 15 when an exit wire bay is used.
 (4) This catalog number must be used for frames 9, 11, 12, 14, and 15 when an exit wire bay is used.
 (5) The slotted bus bars contained in this kit are aluminum. The phase connecting bus bars are copper.
 (6) Replacement stab receptacle assembly only.

DC Bus Bar Assemblies (Frames 8...15, NRS)

This section provides information about DC bus bar, bus bar splice, and bus bar and fuse assembly kits.

Cat. No. ⁽¹⁾	Voltage	Cabinet Width mm (in.)	Cabinet Type	Material	Thickness mm (in.)	Equivalent Frame Size	Used for NRS
DC Bus Bar Kits

20-750-MACL2-EF-F7M	20-750-ML4-E395F370	600/690V	170M6461	690/700V (IEC/U.L.), 700 A ⁽²⁾	3

(1) Bussman Square Body - Flush End Contact -BKN/- Type K Indicator.

DC Output Flex Bus Bar and Fuse Assembly Kit Fuses (Frame 7)

The DC output bus bar and fuse assembly kits contain fuses that, when used with a power module (catalog numbers 20-750-MI4-xnnnnnn), provide short circuit protection.

Bus Bar Assembly and Fuse Kit Cat. No.	Voltage Rating	Bussman Fuse Number	Fuse Rating	Fuse Qty.
20-750-MDCFB-CD-F7M	400/480V	170M6467	690/700V (IEC/U.L.), 1400 A ⁽¹⁾	2
20-750-MDCFB-EF-F7M	600/690V	170M6499	690/700V (IEC/U.L.), 1100 A ⁽²⁾	2

(1) Bussman Square Body - Flush End Contact -BKN/- Type K Indicator.

Recommended Mounting Hardware

Use only the mounting hardware that is supplied or recommended by Rockwell Automation.

Power Cable Connections

ATTENTION: To guard against drive damage, do not connect power cables to bus bars and/or back panel and stab assemblies that are not identified in the Bus Bar and Back Panel and Stab Receptacle Assembly Kits Suitable for Power Connections table.

Power wire connections must be made directly to the bus bars or L-brackets (where applicable) by using barrel lugs and M10 hexagonal bolts and nuts. See UL Listed Barrel Lug Dimensions and Typical Lug Connection/L-Bracket Options for details. Connect power wiring to these bus bar and back panel and stab receptacle assembly kits only. For connection details, see the PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication 750-INI01. For grounding guidelines, see Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication DRIVES-IN001.

Movable L-bracket connectors are available as kits (cat. no. 20-750-MLBRKT-F8M) to connect power cables to the extruded bus bar Kits identified in the Bus Bar and Back Panel and Stab Receptacle Assembly Kits Suitable for Power Connections table. L-brackets must be a minimum of 51.0 mm (2.0 in.) from the side wall of an enclosure.

Kit Cat. No. 20-750-MLBRKT-F8M Contents

Item	Quantity
Movable L-bracket (aluminum)	3
M10 x 1.5 x 35 mm carriage bolt	6
Rectangular clamp washer	6
M10 x 13.3 mm hexagonal nut and washer	18
M10 x 1.5 x 40 mm hexagonal bolt	12
Flat round washer	12

Bus Bar and Back Panel and Stab Receptacle Assembly Kits Suitable for Power Connections

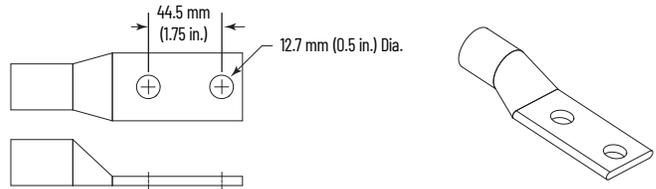

Cat. No.	Connector Type	Width mm (in.)	L-Bracket Compatible
AC Input Connection Kits			
20-750-MTEBUS2-3K0	Slotted bus bars	400 (16)	Yes ⁽¹⁾
20-750-MEMCC2-IPBB	Solid bus bars	800 (31)	No
20-750-MTEBUS1-4K7	Slotted bus bars	800 (31)	Yes ⁽¹⁾
20-750-MACBUS10-3K0	Slotted bus bars	1000 (39)	Yes ⁽¹⁾
20-750-MACBUS10-4K7	Slotted bus bars	1000 (39)	Yes ⁽¹⁾
AC Output Connection Kits			
20-750-MIR1-F8M	Back panel with stab receptacles	400 (16)	No
20-750-MTEBUS2-3K0	Slotted bus bars	400 (16)	Yes ⁽¹⁾
20-750-MIR1-F9M	Slotted bus bars	600 (24)	No
20-750-MIR2-F9M	Slotted bus bars	600 (24)	No
20-750-MADR1-F8M	Back panel with stab receptacles	800 (31)	No
20-750-MADR2-F8m	Back panel with stab receptacles	800 (31)	No
20-750-MEMCC2-F8	Solid bus bars	800 (31)	No
20-750-MEMCC2-F9	Solid bus bars	800 (31)	No
20-750-MEMCC2-F10	Solid bus bars	800 (31)	No
20-750-MIR1-F10M	Slotted bus bars	800 (31)	No
20-750-MIR2-F10M	Slotted bus bars	800 (31)	No
20-750-MTEBUS1-4K7	Slotted bus bars	800 (31)	Yes ⁽¹⁾
20-750-MNIR1	Back panel with stab receptacles	400 (16)	No
20-750-MNIR2	Back panel with stab receptacles	400 (16)	No
20-750-MNIR3	Back panel with stab receptacles	600 (24)	No
20-750-MNIR4	Back panel with stab receptacles	800 (31)	No

(1) L-brackets are permitted in all wire entry/exit bays and in frame 10...12 input bays.

Barrel Lugs

Barrel lugs that are used to make power cable connections to bus bars and back panel with stab receptacle assembly kit terminals must have these dimensions:

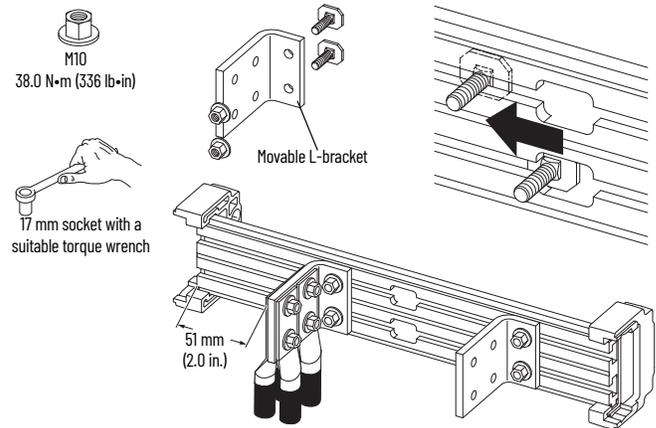

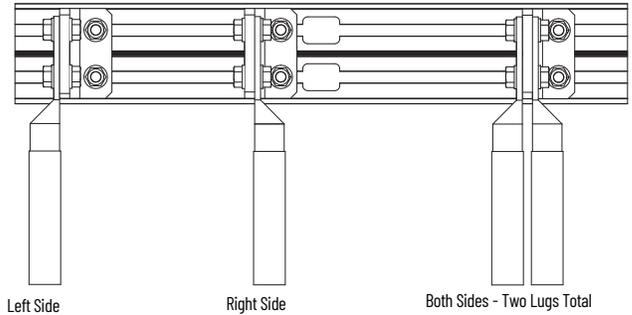

UL Listed Barrel Lug Dimensions

Either two- or one-hole lugs can be used.

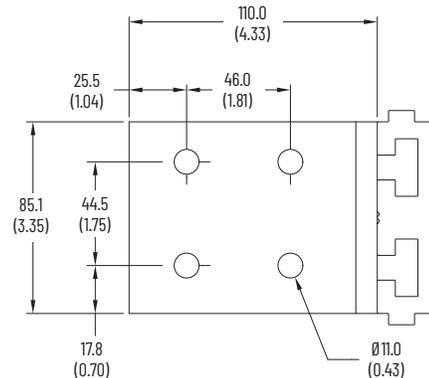

Typical Lug Connection/L-Bracket Options

A maximum of four conductors with the appropriate lug per L-bracket are permitted for UL compliance.

IMPORTANT Verify that the clamp fits squarely in the bus bar channel.

L-Bracket Approximate Dimensions (mm (in.))

Use the vendor-recommended tooling to fasten crimp type terminals to cables. Torque mechanical type terminals according to vendor instructions. When using mechanical terminals, which may be large, be sure to maintain adequate spacing to adjacent wires, terminals, and other parts.

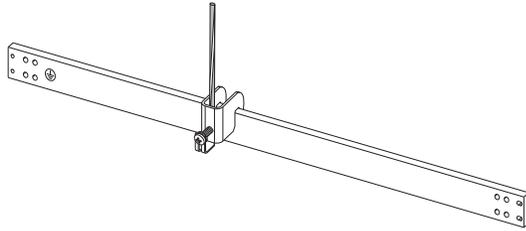

Grounding

The clamp kits that are listed in this table are used to secure round copper ground conductors to 9.5 mm (0.37 in.) thick, tin-plated aluminum, or tin-plated copper ground bus bars with a cross section of 483 mm² (0.75 in.²).

Kit Catalog Number	Conductor Cross-sections ⁽¹⁾		Tightening Torque N•m (lb•in)
	ISO (mm ²)	AWG/MCM	
SK-RM-GRNDCLMP-16	2.5...16	14...6 AWG	3 (27)
SK-RM-GRNDCLMP-50	16...50	6...0 AWG	8 (71)
SK-RM-GRNDCLMP-75	35...75	2...00 AWG	12 (106)
SK-RM-GRNDCLMP-185	70...185	00 AWG ...350 MCM	15 (133)
20-750-MGNDSP1	—	—	10.2 (90)

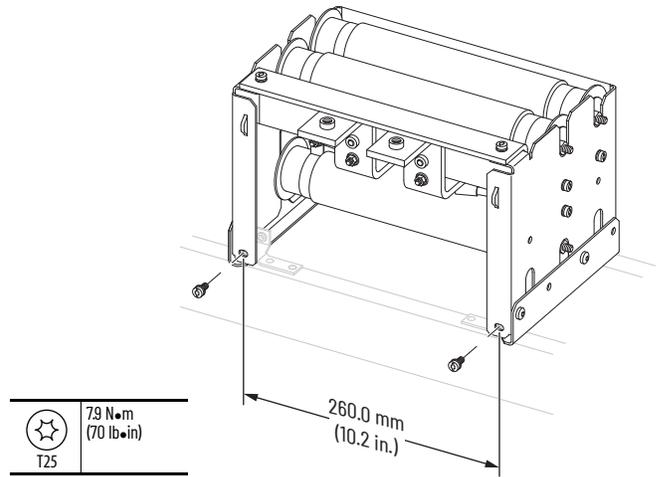

(1) Ground clamps are rated for only one conductor per clamp.

Ground Clamp

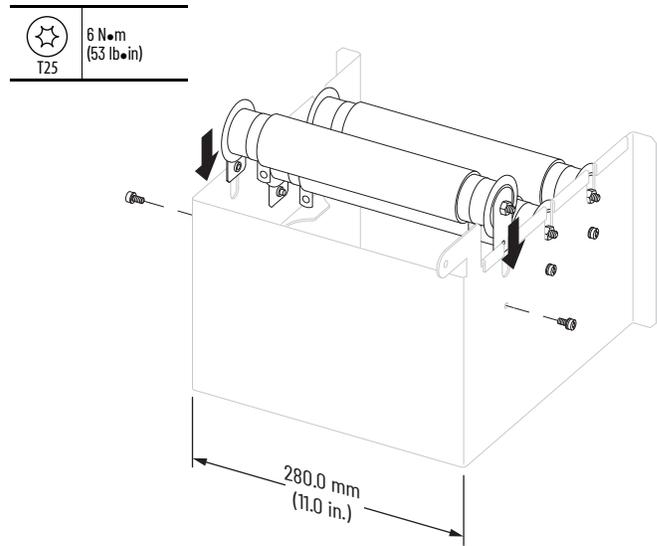

The final assembly Safety Ground-PE must be connected to system ground. Ground impedance must conform to the requirements of national and local industrial safety regulations and/or electrical codes. Periodically check the integrity of all ground connections. For more information on grounding requirements, see PowerFlex 755TM IP00 Open Type Kits Installation Instructions, publication [750-IN101](#), and Wiring and Grounding Guidelines for Pulse Width Modulated (PWM) AC Drives, publication [DRIVES-IN001](#).

Resistor Bank Mounting Instructions (Frames 10...15)

Resistor Bank Mounting Instructions (Frame 7)

Approximate Weights

Approximate weights are provided for the following accessories, which weigh over 22.7 kg (50 lb). Use the appropriate lifting practices and equipment when handling these kits.

Cat. No.	Weight kg (lb)
AC Bus Bars	
20-750-MACBUS6-4K7	38.1 (84.0)
20-750-MACBUS8-4K7	57.6 (127.0)
20-750-MACBUS10-3KO	25.0 (55.0)
20-750-MACBUS10-4K7	66.2 (146.0)
AC Bus Bars Top Cable Exit/Entry	
20-750-MTEBUS1-4K7	53.0 (117.0)
AC Precharge Circuit Breaker Bus Bar Kits	
20-750-MCBBUS1-2KO	73.0 (160.0)
20-750-MCBBUS1-2K5	73.0 (160.0)
20-750-MCBBUS1-5KO	152.0 (335.0)
20-750-MCBBUS1-3KO	81.7 (180.0)
20-750-MCBBUS2-3KO	63.5 (140.0)
Control Transformers (NRS)	
20-750-MN-XMFR2-CD	26.5 (58.3)
20-750-MN-XMFR2-n	26.5 (58.3)

Cat. No.	Weight kg (lb)
AC Bus Bars for EMC C2 Filter	
20-750-MEMCC2-F8	30.5 (68.0)
20-750-MEMCC2-F9	23.2 (52.0)
20-750-MEMCC2-F10	21.6 (48.0)
20-750-MEMCC2-IPBB	34.0 (75.0)
DC Bus Bars	
20-750-MDCBUS3-4K7	25.0 (55.0)
20-750-MDCBUS4-4K7	35.0 (77.0)
20-750-MDCBUS6-4K7	25.4 (56.0)
20-750-MDCBUS8-4K7	39.5 (87.0)
20-750-MDCBUS10-4K7	48.0 (106.0)
Ventilation Kits	
20-750-MVENT2-F10M	60.8 (134.0)
20-750-MVENT2-F9M	33.1 (73.0)
20-750-MVENT2-F8M	30.8 (68.0)
