

Connected Components Accelerator Toolkit

Simpler, Faster, Cost-Effective Machine Building

Benefits

The Connected Components Accelerator Toolkit helps OEMs achieve:

- Faster machine design times
- Reduced engineering efforts
- Lower overall costs
- Increased machine performance

Supported Products:

- Micro800® Controllers
- PowerFlex® Compact Drives
- PanelView™ Component Graphic Terminals
- Kinetix® Component Servo Drives
- Guardmaster® 440C Configurable Safety Relay

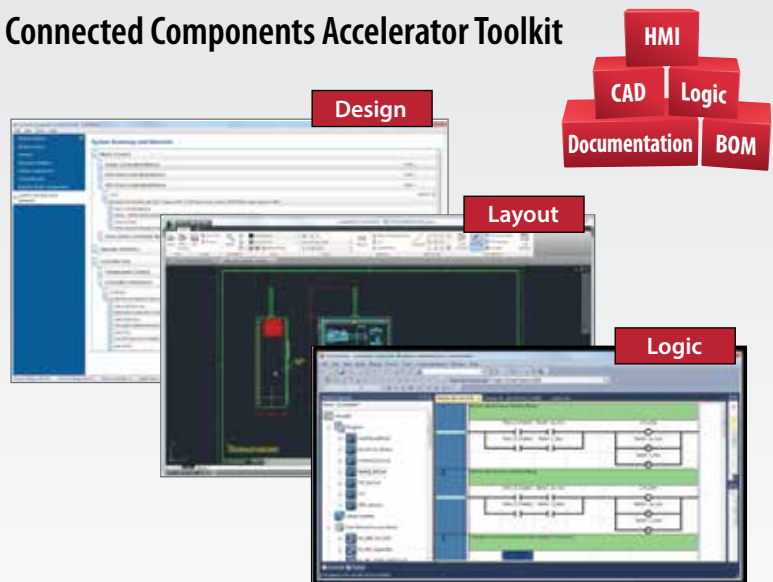

Connected Components Accelerator Toolkit reduces your initial machine design.

Connected Components Accelerator Toolkit

Overview

The Connected Components Accelerator Toolkit provides guidance for the entire machine control application development. It allows OEMs to concentrate on the intellectual property that produces compelling and differentiating machine features.

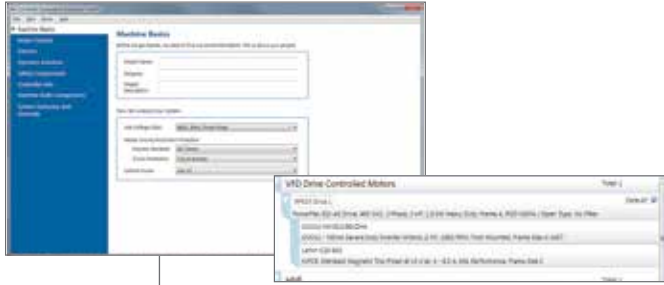

Select desired products from easy to use drop-down menus. The Connected Components Accelerator Toolkit checks product choices for compatibility. Once products are selected, the toolkit automatically generates project documentation, reducing machine development time getting you to market more quickly.

Tools provided:

- Lists of compatible materials
- Customized panel layout and wiring drawings usable in CAD Software
- Control programs include user-specific names and descriptions
- HMI screens including diagnostics
- Quick start guides
- Best-practice based designs

LISTEN.
THINK.
SOLVE.®

Reduce Design Time with Connected Components Accelerator Toolkit

Easy to Design

- Clear menu structure aids in product selection for your system
- By using customized names in the generated design files, they are significantly easier to use, resulting in a much shorter learning curve and design time requirement
- Automatically generates customized BOM, CAD set, controller program and HMI screens for your machine

Easy to Customize

- Quickly modify devices or add more devices to your bill of material
- Tailor your complete system layout and wiring drawing set
- Customize your logic and HMI screens

Easy to Use

- Best practice-based programs given to help with your overall machine control
- Drop-down menus for product selection
