

# COURSE DESCRIPTION

## RSLogix™ 5 Software

### RSTrainer® for RSLogix 5 Software

#### SELF-PACED LESSONS

##### *RSTrainer Introduction*

- Working with RSTrainer Software
- Installing RSLogix 5 Software
- Screen Layout, Navigation, and Help

##### *Offline Programming*

- Creating a New Project and Editing Ladder Logic
- Database (Documentation)
- Reporting
- Backup Utilities

##### *Online Programming*

- Communications
- Upload/Download and Going Online
- Diagnostics: Searching and Data Table Monitoring

##### *Course Purpose*

This interactive, computer-based training course teaches you the core tasks required for programming an RSLogix 5 project. This course also provides you with information on how to install, configure, and navigate through RSLogix 5 software.

During this course, you will learn how to transfer an RSLogix 5 project from a computer to the processor, document ladder logic, and monitor data through step-by-step demonstrations. Through the demonstrations, you will learn about the various settings and options in the software and see how to perform the required tasks for example automation control applications.

Helpful animations, background information, and links to other reference materials provide you with a variety of knowledge and learning tools. These tools, combined with the step-by-step demonstrations, will provide you with the knowledge and skills required to perform each task. You will also have the opportunity to practice performing software tasks through interactive simulations. These simulations will guide you through the required steps and give you immediate feedback on your performance to reinforce learning.

You will also be given multiple opportunities to test your knowledge through question and answer sessions. These question and answer sessions will allow you to gauge your knowledge level and help you identify areas for improvement.

# COURSE DESCRIPTION

## RSLogix™ 5 Software

### ***Intended Audience***

This RSTrainer course is intended for the following audiences:

- Individuals who prefer self-paced instruction
- Individuals who cannot attend classroom training
- Users of Rockwell Automation RSLogix 5 Software who need refresher training
- Individuals interested in the features and capabilities of RSLogix 5 software

### ***Learning Activities & Features***

RSTrainer courses include the following features:

- Information overviews
- Discussions of basic principles and/or concepts
- Descriptive and detailed technical explanations
- Animated sequences
- Interactive and integrated practice exercises
- Interactive simulations
- Online help
- Index to locate specific course topics
- Embedded Adobe® Acrobat® PDF files of technical manuals and Installation Guides
- Links to useful reference material
- Glossary of terms

### ***Prerequisites***

To successfully complete this course, you should be able to perform basic Microsoft® Windows® tasks.

### ***To Purchase***

To register for this or any other Rockwell Automation training course, contact your local authorized Allen-Bradley Distributor or your local Sales/Support office.

You can also access course information via the Web at <http://www.rockwellautomation.com/services>

### ***Catalog Number***

*RSTrainer for RSLogix 5 Software: 9393-RSTLX5*
