

PowerFlex® 700 Vector Control Drives

COURSE DESCRIPTION

COURSE AGENDA

- Configuring Drive Parameters Using the LCD HIM
- Configuring Drive Parameters Using DriveExplorer Software
- Configuring Drive Parameters Using DriveExecutive Software
- Uploading and Downloading Drive Data
- Starting Up a Drive
- Controlling Drive Operation
- Installing and Configuring an EtherNet/IP Communications Adapter
- *Optional: Installing and Configuring a Remote I/O Communications Adapter*
- *Optional: Installing and Configuring a DeviceNet Communications Adapter*
- *Optional: Installing and Configuring a ControlNet Communications Adapter*

PowerFlex® 700 Vector Control Configuration and Startup

COURSE NUMBER: CCA161

Course Purpose

This skill-building course introduces techniques and instructions that will assist you in successfully configuring and starting up a PowerFlex 700 vector control drive.

Throughout the course, the instructor will demonstrate how to configure PowerFlex 700 drive parameters. The instructor will also demonstrate how to install and commission one or more of the following communications adapters:

- ControlNet
- DeviceNet
- EtherNet/IP
- Remote I/O

After each demonstration, you will be given an application-based exercise that offers extensive hands-on practice using the LCD HIM, DriveExplorer™ software, and DriveExecutive™ software.

This one-day course can be taken as a stand-alone course, or it can be taken in conjunction with other courses in the PowerFlex 700 curriculum for further skill development.

Who Should Attend

Individuals responsible for configuring parameters and starting up PowerFlex 700 vector control drives should attend this course.

Prerequisites

To successfully complete this course, the following prerequisites are required:

- Experience operating a personal computer within a Microsoft® Windows® environment
- Completion of the *AC/DC Motors and Drives Fundamentals* course (Course No. CCA101) or equivalent experience

Student Materials

To enhance and facilitate students' learning experience, the following materials are provided to each student as part of the course package:

- *Student Manual*, which contains the key concepts, definitions, and examples presented in the course and includes the hands-on exercises.
- *PowerFlex 700 Standard and Vector Control Procedures Guide*, which provides all the steps required to complete common PowerFlex 700 tasks, including the tasks in the hands-on exercises. By following the procedures in this job aid, you can immediately apply what is learned in the course to your own job.
- *PowerFlex 700 Standard and Vector Control Documentation Reference Guide*, which contains excerpts from several PowerFlex™ technical publications. This guide contains the most frequently referenced information and is a quick and efficient on-the-job resource.
- *PowerFlex Standard and Vector Control Quick Reference Guide*, which provides lists of parameters in both alphabetic and numeric order, as well as other information to assist with locating, monitoring, and modifying PowerFlex 700 drive parameters.

Hands-On Practice

Hands-on practice is an integral part of learning, and this course offers extensive hands-on opportunities. An in-class workstation allows students to configure parameters, install communications adapters, and start up the drive. Students will perform the tasks using a PowerFlex 700 AC drive workstation and a fan demo. The fan application introduces real-world configuring situations into a classroom setting.

Course Length

This is a one-day course.

Course Number

The course number is CCA161
