

# Horsepower Change Kits

*Typical Allen-Bradley horsepower upgrade components*

## Product Profile

As your application needs change, changing your existing system horsepower saves the cost of new equipment. Rockwell Automation Horsepower Change Kits convert your existing Allen-Bradley medium voltage equipment to required horsepower, using existing space requirements and no additional wiring in most cases, for a cost-effective system solution.

### Easy Installation

The Horsepower Change Kit is an easily installed option (with the exception of major upgrades), that is done on-site to reduce downtime.

### Required Information

- Proposed plan
- Original sales order number
- New motor data - motor data sheet preferred
- Any additional equipment modification carried out since original commissioning

**Note:** Programming of motor protection relay for new application is required.

Customer must select power correcting capacitors.

Motor protection upgrades available upon request.

### Commitment to Excellence

All horsepower change requests are reviewed by Rockwell Automation engineers to ensure a smooth transition.
