

LICENSED TECHNOLOGY PARTNERS

Today's most demanding applications rely on the successful combination of quality, design integrity and compatibility in the components used within the larger automation system. Rockwell Automation Technologies, Inc. (RA-Tech) Licensed Technology Partners give product designers access to the same future-proof technologies and product innovations that Rockwell Automation already incorporates into its own products.

The tools, technologies and know-how that are marketed by these Licensed Technology Partners are derived directly from proven Allen-Bradley, Reliance Electric and Rockwell Software products. These technologies may come in the form of a software developer's toolkit, a highly-customized hardware enabler, or perhaps even as just plain design validation and engineering advice. Regardless, Licensed Technology Partners make RA-Tech technology available to help designers streamline their product development process, get their products to market faster, and help maximize overall customer satisfaction with the final product.

Technology Value-Added Reseller (VAR) Program

Adding Value... One class of technology partner is the RA-Tech Value Added Reseller (VAR). These partners design, market and supply enabling products that already incorporate RA-Tech technologies which can dramatically reduce product development times and support burdens. Here is a list of RA-Tech VARs:

Technology VAR Partners

Hilscher (www.hilscher.com)

Delivering robust connectivity to contemporary industrial networks including DeviceNet™, ControlNet™, EtherNet/IP™, Hilscher offers both chip and board-level Slave and Master connectivity solutions.

Suite 100, 2443 Warrenville Rd. Lisle, IL 60532 USA Contact: Phil Marshall Phone: (+1) 630-505-5301 Fax: (+1) 630-505-7532 e-mail: pmarshall@hilscher.com	Rheinstraße 15 D-65795 Hattersheim Contact: Sales & Support Phone: (+49) 06190 9907-0 Fax: (+49) 06190 9907-50 e-mail: info@hilscher.com
--	--

Online Development Inc. (www.oldi.com)

Featuring unparalleled design and manufacturing expertise, Online Development's competency with RA-Tech technologies help satisfy the specialized needs of developers and OEMs alike.

7209 Chapman Hwy.
Knoxville, TN 37920 USA
Contact: Ron Monday
Phone: (+1) 865-251-3540
Fax: (+1) 865-579-4740
e-mail: rmonday@oldi.com

HMS Industrial Networks (www.hms-networks.com)

Facilitating a broad range of network connectivity via standard communication interfaces, HMS helps to reduce development investments associated with DeviceNet, ControlNet and EtherNet/IP.

1925 N Clybourn, Suite 300 Chicago, IL 60614 USA Contact: Trevor Lang Phone: (+1) 773-404-2406 Fax: (+1) 773-404-1797 e-mail: trl@hms-networks.com	Pilefeltsgatan 93-95 302 50 Halmstad, SWEDEN Contact: Staffan Dahlstrom (+46) 35-17-29-00 Fax: (+46) 35-17-29-09 e-mail: std@hms-networks.com
---	--

WindRiver Systems, Inc. (www.windriver.com)

Offering VxWorks® RTOS, the proven real-time, embedded operating system with EtherNet/IP extensions, WindRiver's solutions help to streamline developments and assure integrity in device operation.

201 Moffett Park Drive
Sunnyvale, CA 94089
Contact: Marc Serughetti
Phone: (+1) 408-542-1902
Fax: (+1) 408-542-1958
e-mail: marc.serughetti@windriver.com

Value Added Design Partner (VADP) Program

The Art of design... RA-Tech licensed Value Added Design Partner (VADP) are worldwide agents and technology experts who design and develop products that incorporate RA-Tech technologies in concert with and on behalf of other companies to shorten design and development cycles, increase product/system functionality, and ultimately get products to the market faster. Skilled in the Common Industrial Protocol (CIP™), and hardware and software architecture and design, a RA-Tech VADP's services can yield feature-rich connectivity for devices that range from sensor to software.

Each authorized VADP is a licensed reseller of certain RA-Tech technologies including RA-Tech's premier Master-stack Libraries for [DeviceNet](#), [ControlNet](#), and [EtherNet/IP](#). Scalable adaptations of these communication stacks include slave/adaptor-class and master/scanner-class implementations. Here's a list of RA-Tech VADPs:

Specialties & Capabilities

- Design and Development
- Technology Training
- Validation and Testing
- Support and Maintenance
