RE: European Union WEEE and RoHS Directives

Dear Customer,

Rockwell Automation is committed to demonstrating the highest standard of global environmental management. We embrace this as a core value and an integral part of all operations and seek continual improvement of our environmental management system and performance. Our dedication is demonstrated by our compliance efforts as they apply to the following European Directives:

European Directive 2012/19/EU - *Waste Electrical and Electronic Equipment (WEEE)* applies to the collection, treatment, reuse/recycling/recovery and environmentally sound disposal of certain electrical and electronic products. Rockwell Automation products falling within the scope of the WEEE Directive are computer products (such as industrial computers, monitors, and accessories), plus some portable instruments (for data entry/retrieval, program storage, etc.). Rockwell Automation is committed to meeting our legal obligations under WEEE and has a program in place to ensure compliance for in-scope products.

European Directive 2011/65/EU—*The Restriction of Hazardous Substances (RoHS)* restricts the use of six hazardous substances in electrical and electronic equipment. Rockwell Automation products currently required to comply with RoHS are Category 3 products (IT and Telecommunications Equipment) such as industrial computers, monitors, and accessories. Rockwell Automation Category 3 products that fall within the scope of the RoHS Directive are fully compliant with the material restrictions, conformity assessment and CE-marking requirements. Furthermore, Rockwell Automation's goal is to meet the RoHS material restrictions, conformity assessment and CE-marking requirements for all of our Category 9 products (*Industrial Monitoring and Control Instruments*) prior to the mandatory date of 22 July 2017 set out in the RoHS Directive (2011/65/EU).
