

The Power of Collaboration Working for You

PartnerNetwork™ Solutions from Rockwell Automation

**Providing In-chassis,
Gateway and Wireless
Communication Solutions
for Rockwell Automation**

- Protocol Interfaces
- Wireless Solutions
- Stand-alone Gateways
- Data Transfer

LISTEN.
THINK.
SOLVE.

What Does ProSoft Technology do for Rockwell Automation Customers?

Prosoft Technology is your leading industrial communication supplier. We are your single source provider for products that connect disparate systems and devices in a reliable, cost-effective manner.

ProSoft products are designed specifically to provide non-core network connectivity for the Rockwell Automation architecture. These products include in-rack connectivity options for ControlLogix® PACs, CompactLogix™ PACs, SLC™ PLCs, and FLEX™ I/O modules as well as stand-alone gateways and many wireless solutions.

Company Profile

Our specialty is providing connectivity solutions that link dissimilar automation products. But we don't just sell products. We sell tested, field-proven solutions that are tightly integrated into the Rockwell Automation architecture.

Our long-standing partnership with Rockwell Automation and our industry-leading technical support make us your single source global provider for products that will assist in a new connectivity or migration strategy.

With our Global Encompass-referenced products you can be sure they will cohesively work with your Rockwell Automation architecture easily and effectively.

How Can ProSoft Help You Connect to non-core Networks?

We provide both in-rack and stand-alone gateway interfaces for over 60 communication protocols. These modules and gateways offer interoperability between Rockwell Automation networks and third-party systems. Available solutions include Modbus, Modbus TCP/IP, Modbus Plus, PROFIBUS DP, HART Multidrop and Analog, DNP 3.0, EtherNet/IP, Honeywell DE, IEC 60870-5, ASCII, Remote I/O, DH-485, DF1, 'C' programmable and many more.

Do You Need to Migrate Data From a third-party PLC to ControlLogix PAC?

You can with ProSoft's Message Manager! ProSoft's Message Manager is our next generation data transfer engine which enables users to easily migrate to the ControlLogix PAC platform from legacy Allen Bradley® PLCs or third-party PLCs such as Siemens' S5/S7 using Industrial Ethernet and Schneider Electric processors or other devices using Modbus TCP/IP. The Message Manager requires no special software to buy or maintain and no PLC programming is needed.

"If you need to connect to non-core protocols or implement a phased-migration from legacy devices, ProSoft Technology has your solution."

Ken Roslan, Director of Marketing, ProSoft Technology

Need to Migrate your Legacy I/O Platforms, PanelViews or Allen-Bradley Drives?

ProSoft Technology's AN-X gateways are powerful migration tools designed to allow ControlLogix PACs to control Legacy I/O platforms such as Remote I/O, DH+, Modicon S908, Texas Instruments 505, and GE Genius. The AN-X gateways also allow classic PanelViews and Allen-Bradley Drives on Remote I/O to be upgraded to a new PanelView Plus 6 or PowerFlex drive on EtherNet/IP.

Why Choose ProSoft Technology Wireless Products?

We understand all the nuances of industrial network and fieldbus protocols as well as wireless networks. We can help define your wireless network as it relates to your automation network. We provide a full range of wireless products, accessories and the technical expertise to help integrate your networks successfully.

- 802.11 abgn Industrial Hotspots and Clients
- Frequency Hopping Radios, 900 MHz, 2.4 GHz or 5 GHz, Serial or Ethernet
- Intelligent Cellular

What is the Advantage of Using ProSoft's In-rack Flow Computer Solutions for Custody Transfer?

ProSoft's single-slot flow computers allows a Logix controller to replace dedicated flow computers, for a very cost-effective solution.

These modules easily support liquid and gas applications performing up to 16 meter runs using AGA 3, 7, 8 and API 2540 measurement standards.

PartnerNetwork™

The PartnerNetwork program is a framework of well-managed relationships formed as a result of customer need. It provides manufacturers with access to a local, regional and worldwide network of best-in-breed specialists. These partners offer the industry experience and technological know-how to help solve business challenges both large and small.

Through the PartnerNetwork program, Rockwell Automation delivers a wide array of solutions, easier access to knowledge, and consistent delivery of solutions to help improve our customer's business results.

Who We Are

ProSoft Technology's expertise in the industrial automation world provides you with a distinct competitive advantage. From our development engineers to the technical support team; from our knowledgeable sales staff to those who process orders and prepare our products for distribution; everyone at ProSoft is dedicated to increasing your automation performance, raising productivity, decreasing downtime and reducing costs.

Our worldwide technical support team is available to assist you from pre-sales questions to set-up and throughout the life-cycle of the product.
