

# Fast and Local Drives Solutions

FasTrac Offerings for PowerFlex Drives

## We get it...

Your customers have high expectations. Your packaged drives should also reflect the same level of performance and quality that is expected when you partner with a world leader in motor controls.

### Compress the Schedule

You run your projects fast and lean but changes happen. Our turnkey offerings allow you to identify and remove areas with slack, hit milestones or simply free up resources to focus on areas of need.

### Focus Your Engineers

Your projects rely on the expertise and domain knowledge of your engineers that set your team apart. Keep them in front of your customers by freeing them from low-value and repetitious tasks.

### Control Cost

It's the little things that add up. Wire, ring lugs, testing...the list goes on and on. We handle these burdens so you don't have to source and manage around unplanned variances.

A large industrial facility with multiple rows of long, narrow tanks or basins, likely for water treatment or chemical processing. The tanks are arranged in a grid-like pattern, and the facility is surrounded by a fence. The sky is clear and blue.

Leverage our application experience  
to make your next project a success.

## Pre-Engineered PowerFlex Drives

Broader factory-mounted options with proven designs that are easy to quote and fast to deliver

Now you can conveniently configure and price in our ProposalWorks tool to meet more precise application requirements. Our pre-engineered drives are available for PowerFlex® 755T drives in frames 5 and 6. Packaging options include NEMA 1, 12, 3R, and 4X outdoor type enclosures.

Program options include PowerFlex 753/755 offerings where applicable:

- Input circuit breaker or fused disconnect
- Door-mounted pushbuttons and selector switches
- Optional door-mounted HIM (Type 12 only)
- Drive bypass

## Engineered-to-Order PowerFlex Drives

Designs tailored to meet your most challenging application and schedule

With local support and decades of experience, we reduce variability by adhering to industry standards and quality-driven manufacturing procedures.

Our engineered-to-order drives are available for PowerFlex 755TR, 755TL, and 755TM in frames 5 and above.

Personalized quotes are available through your local distributor or Rockwell Automation Local Solution Center consultants.

## Our FasTrac Program at our Local Solutions Centers is designed to deliver:

- High quality
- Ease of use
- Quick proposal turn-around
- Competitive price
- On-time delivery
- Superior customer service

## We've got you covered

If you don't already have access to our configuration tool for pre-engineered drives, download the ProposalWorks tool at [rok.auto/pst](https://rok.auto/pst).

Engineered-to-order quotes are available through your local distributor or Rockwell Automation Local Solution Center consultants.
