

13 September 2015
Ref: 615-80353-130915

To:
Mr. Meir Ifergan
Rockwell Automation Israel Ltd.
3 HaMachshev St.
Netanya

**Subject: Approval for use of CENTERLINE2500 MCC
System of Rockwell Automation Inc. ,
as an Original Manufacturer manufacturer of electrical panels**

- 1) The Professional Committee for Electrical Panels approved the abovementioned system from your production for assembly of electrical panels according to the following:

Original manufacturer	Name of system	Name of agent in Israel	Approved for currents	Approved for main equipment
Rockwell Automation Inc.	CENTERLINE2500	Rockwell Automation Israel Ltd.	2500 A	MCCB - Allen Bradley ACB - ABB

Note: This is NOT an approval for the Assembly Manufacturer.

- The Professional Committee reviewed the technical material submitted by the system manufacturer, and the results of the system test performed by the Electrical Laboratory at SII and gave its approval for use of this system for the manufacture of electrical panels.
- The assembly manufacturer who wants to manufacture panels and mark them with the Standards Mark shall submit a request for receiving a license to mark electrical panels with the Standards Mark while specifying the system name and the equipment manufacturer.
- After completion of the preliminary clarifications stage and meeting all the requirements, granting of the license will be brought before the Professional Committee for review. The committee is authorized to recommend to the Licensing Committee to grant a license to the manufacturer for marking electrical panels with the Standards Mark.
- It is hereby acknowledged that only electrical panels assembled from an approved system may be marked with the Standards Mark.

Regards,

Joshua Miller
Head of Standards Mark Operation Directorate

- cc:
- Dr. Noldy Greenberg - Chairman of Professional Committee for Electrical Panels
 - Nahum Handelsman - Head of Electrical Laboratory
 - Motti Ayalon - Responsible For Electrical Switchgear, Ind. Branch, Electrical Laboratory
