For more information on the PanelView 550/600 Operator Terminals, refer to Publication 2711-UM014.
Important User Information

Solid state equipment has operational characteristics differing from those of electromechanical equipment. Safety Guidelines for the Application, Installation and Maintenance of Solid State Controls (Publication SGI-1.1 available from your local Rockwell Automation sales office or online at http://literature.rockwellautomation.com) describes some important differences between solid state equipment and hard-wired electromechanical devices. Because of this difference, and also because of the wide variety of uses for solid state equipment, all persons responsible for applying this equipment must satisfy themselves that each intended application of this equipment is acceptable.

In no event will Rockwell Automation, Inc. be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this manual are included solely for illustrative purposes. Because of the many variables and requirements associated with any particular installation, Rockwell Automation, Inc. cannot assume responsibility or liability for actual use based on the examples and diagrams.

No patent liability is assumed by Rockwell Automation, Inc. with respect to use of information, circuits, equipment, or software described in this manual.

Reproduction of the contents of this manual, in whole or in part, without written permission of Rockwell Automation, Inc., is prohibited.

Throughout this manual, when necessary, we use notes to make you aware of safety considerations.

| WARNING | Identifies information about practices or circumstances that can cause an explosion in a hazardous environment, which may lead to personal injury or death, property damage, or economic loss. |
| IMPORTANT | Identifies information that is critical for successful application and understanding of the product. |
| ATTENTION | Identifies information about practices or circumstances that can lead to personal injury or death, property damage, or economic loss. Attentions help you identify a hazard, avoid a hazard and recognize the consequences. |
| SHOCK HAZARD | Labels may be on or inside the equipment, for example, a drive or motor, to alert people that dangerous voltage may be present. |
| BURN HAZARD | Labels may be on or inside the equipment, for example, a drive or motor, to alert people that surfaces may reach dangerous temperatures. |
Hazardous Location Considerations

This equipment is suitable for use in Class I, Division 2, Groups A, B, C, D; Class II, Division 2, Groups F, G; Class III, Division 2; or non-hazardous locations only. The following WARNING statement applies to use in hazardous locations.

**WARNING**

- Substitution of components may impair suitability for Class I, Class II, Class III Division 2.
- Do not replace components or disconnect equipment unless power has been switched off or the area is known to be non-hazardous.
- Do not connect or disconnect components unless power has been switched off or the area is known to be non-hazardous.
- This product must be installed in an enclosure. All cables connected to the product must remain in the enclosure or be protected by conduit or other means.
- All wiring must comply with N.E.C. article 501-4(b), 502-4(b), 503-3(b) as appropriate.

See the nameplate on terminal for hazardous locations certifications.

**ATTENTION**

In Class 1, Class II, Class III, Division 2 Hazardous locations, the PanelView 550 terminal must be wired per the National Electric Code as it applies to hazardous locations. Peripheral equipment must also be suitable for the location in which it is installed.

The following PV550 terminals have an operating temperature code of T2 (maximum operating temperature of 300 °C or 572 °F).
- touch screen only terminals (series A)

Do not install these terminals in environments where atmospheric gases have ignition temperatures less than 300 °C (572 °F).

The following PV550 following PV550 terminals have an operating temperature code of T4 (maximum operating temperature of 135 °C or 275 °F).
- touch screen only terminals (series B and later)

Do not install these terminals in environments where atmospheric gases have ignition temperatures less than 135 °C (275 °F).

The PanelView 600 touch screen terminals have an operating temperature code of T4 (maximum operating temperature of 135 °C or 275 °F). Do not install the terminals in environments where atmospheric gases have ignition temperatures less than 135 °C (275 °F).
European Union Directive Compliance CE

If a PanelView 550/600 touch screen terminal is installed within the European Union or EFTA regions and has a CE mark, the following regulations apply.

This apparatus is tested to meet directive:

Using the following standards, in whole or in part:

- EN 61000-6-2:1999 EMC - Generic Immunity Standard, Part 2 - Industrial Environment
- EN 61131-2:1995 EMC - Programmable Controllers - Equipment Requirements and Tests

The product described is intended for use in an industrial environment.

Intended Use of Product

According to these Standards, the factor which determines, for EMC purposes, whether an apparatus is deemed to be “Industrial” or “Residential, commercial and light industrial”, is given in Clause 1 of EN50081-2 as follows:

Apparatus covered by this standard is not intended for connection to a public mains network but is intended to be connected to a power network supplied from a high- or medium-voltage transformer dedicated for the supply of an installation feeding a manufacturing or similar plant.

The PanelView 550/600 touch screen terminal is intended for use solely in an industrial environment as defined above. When installed in Europe, any other application is in contravention of European Union Directives, and a breach of these laws.
Wiring and Safety Guidelines

Install the PanelView 550/600 touch screen terminal using publication 70E, Electrical Safety Requirements for Employee Workplaces. In addition to the NFPA general guidelines, follow these recommendations:

- Route incoming power to the PanelView 550/600 terminal by a separate path from the communications cable.
- Where power and communication lines must cross, they should cross at right angles. Communications lines can be installed in the same conduit as low level DC I/O lines (less than 10 Volts).
- Grounding minimizes noise from Electromagnetic Interference (EMI) and is a safety measure in electrical installations. To avoid EMI, shield and ground cables appropriately.
- A source for grounding recommendations is the National Electrical Code published by the National Fire Protection Association of Boston.

Enclosures

Mount the PanelView 550/600 touch screen terminal in a panel or enclosure to protect the internal circuitry. The terminal meets NEMA Type 12/13 and 4X (indoor use) ratings only when properly mounted in a panel or enclosure with the equivalent rating.

Allow enough space within the enclosure for adequate ventilation. Consider heat produced by other devices in the enclosure. The ambient temperature around the:

- PV550 terminal must be between 0…55 °C (32…131°F).
- PV600 terminal must be between 0…50 °C (32…122°F).

Make provisions for accessing the back panel of the terminal for wiring, maintenance, installing a memory card, and troubleshooting.
Required Tools

Other than the tools required to make the panel cutout, the tools required for installation are:

- 7mm (M4) deep well socket wrench or nut driver.
- small slotted screwdriver.
- torque wrench (N•m, lb•in).

Mounting Dimensions

PV550 Touch

![PV550 Touch Top View](image)

PV600 Touch

![PV600 Touch Top View](image)
Clearances

Allow adequate clearances for mounting, air flow, maintenance, and for installing a memory card.

Side, Top and Bottom Clearances

TERMINAL CUTOUT

Use Full Size Template shipped with Terminal

25 mm (1 in.) for Mounting/Air Flow

PV550 Back Clearance

Memory Card Retainer

64 mm (2.54 in.)

109 mm (4.30 in.)

188 mm (7.4 in.) is required to insert and remove a memory card with the memory card retainer.

PV600 Back Clearance

Memory Card Retainer

79 mm (3.12 in.)

132 mm (5.21 in.)

211 mm (8.30 in.) is required to insert and remove a memory card with the memory card retainer.
Cutout Dimensions

Use the full size template shipped with the PV550 or PV600 terminal to mark the cutout dimensions. The figure below shows a reduced size cutout.

- 4.8 mm dia. (0.188 in.)
- 98 mm (3.86 in.)
- 165 mm (6.49 in.)
- 158 mm (6.20 in.)
- R 1.8 mm dia. (0.07 in.)
- 125 mm (4.91 in.)
Installing Terminal in Panel

To install the PV550/PV600 touch screen terminal in a panel:

1. Cut an opening in the panel using the panel cutout provided with the terminal. Remove sharp edges or burrs.

2. Make sure the sealing gasket is properly positioned on the terminal (as shown below). This gasket forms a compression type seal. Do not use sealing compounds.

3. Place the terminal in the panel cutout.
4. Install the 4 self-locking nuts, hand tight.

5. Alternately tighten the self-locking nuts until the terminal is held firmly against the panel. Tighten the nuts to a torque of 1.13 N•m (10 lb•in). Do not overtighten nuts.

**ATTENTION**

Mounting nuts must be tightened to a torque of 1.13 N•m (10 lb•in) to provide a proper seal and to prevent potential damage to the terminal. Allen-Bradley assumes no responsibility for water or chemical damage to the terminal or other equipment within the enclosure because of improper installation.

6. Remove the protective installation label covering the top vents of the terminal.

**ATTENTION**

Failure to remove the protective installation label covering the top vents could result in overheating and damage to the terminal.
Installing the Memory Card Retainer

The memory card retainer is required for UL508 installations where a memory card is inserted in the card slot. The retainer protects against Electrostatic Discharge (ESD) up to 15KV and prevents accidental removal of a memory card in high vibration environments.

To attach the memory card retainer:

1. Secure the base of the retainer over the existing memory card slot using the two screws provided. Tighten screws to a torque of 6…8 lb•in (0.7…0.9 N•m).

2. Insert the memory card and install the retainer until it is properly seated.

3. To remove the retainer, press the tabs on each side and pull.
Connecting DC Power

All of the PV550/600 touch screen terminals (e.g., Catalog No. 2711-T5A1L1 or 2711-T6C8L1) connect to a 24V DC power source.

The table below shows the electrical ratings for the DC versions of the terminals. Electronic circuitry and an internal fuse protect the terminals from reverse polarity and over-voltage conditions.

<table>
<thead>
<tr>
<th>Terminal Type</th>
<th>Supply Voltage</th>
<th>Power Consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>PV550 Touch</td>
<td>18…2V DC, (24V DC nominal)</td>
<td>18 Watts max. (0.75 Amps @ 24V DC)</td>
</tr>
<tr>
<td>PV600 Touch</td>
<td>18…32V DC, (24V DC nominal)</td>
<td>24 Watts max. (1.0 Amps @ 24V DC)</td>
</tr>
</tbody>
</table>

**ATTENTION**

Do not connect the PanelView terminal to an AC power source. Connecting to an AC power source may damage the terminal.

**ATTENTION**

The PanelView 550/600 terminal is designed for safe use when installed in a suitably rated NEMA Type 12, 13, 4X (indoor use only), IP54 or IP65 enclosure.

**ATTENTION**

Use only a Safety Extra Low-Voltage (SELV) power supply as a source for the PanelView 550/600 terminal. A SELV power supply does not exceed 42.4V DC.
To connect DC power to the PV550/PV600 touch screen terminal:

1. Secure the DC power wires to the terminal block screws.
2. Secure the Earth Ground wire to the correct terminal block screw.

**ATTENTION**

Explosion Hazard - Do not connect or disconnect equipment while circuit is live unless area is known to be non–hazardous.

**ATTENTION**

Do not apply power to the terminal until all wiring connections have been made. Failure to do so may result in electrical shock.

3. Apply 24V DC power to the terminal.
EtherNet/IP Protocol

The PanelView terminal is initially set to DHCP with BootP support (Dynamic Host Configuration Protocol) enabled. If your network has a DHCP/BootP server, you can connect the PanelView terminal to the EtherNet/IP network and the DHCP/BootP server will automatically establish an IP address. If your network does not have a DHCP/BootP server, you need to program an IP address. This is done by accessing Configuration Mode on the PanelView terminal and selecting Communication Setup. For details, refer to the PanelView Standard Operator Terminals Manual.

**IMPORTANT**

If a PanelView is connected to an EtherNet/IP network and has the same IP address as another device on the network, both devices will drop off the network.

ControlNet Protocol

**IMPORTANT**

When making ControlNet connections, only use the PanelView Channel B for redundant communications. Connecting Channel B to a Channel A only ControlNet network will result in:

- the PanelView not being able to communicate over the network
- a PanelView communications fault after several minutes

Battery Removal and Disposal

The terminal contains a lithium battery, which is intended to be replaced during the life of the product.

**ATTENTION**

The clock module contains lithium. Do not dispose of the battery in a fire or incinerator, or the clock module may explode. Follow disposal regulations in your area for lithium battery disposal.

At the end of its life, the battery contained in this product should be collected separately from any unsorted municipal waste.
Follow these steps to remove or replace the battery.

Rockwell Automation Support

Rockwell Automation provides technical information on the Web to assist you in using its products. At http://support.rockwellautomation.com, you can find technical manuals, a knowledge base of FAQs, technical and application notes, sample code and links to software service packs, and a MySupport feature that you can customize to make the best use of these tools.

For an additional level of technical phone support for installation, configuration and troubleshooting, we offer TechConnect support programs. For more information, contact your local distributor or Rockwell Automation representative, or visit http://support.rockwellautomation.com.

Installation Assistance

If you experience a problem within the first 24 hours of installation, please review the information that's contained in this manual. You can also contact a special Customer Support number for initial help in getting your product up and running.

Outside United States: Please contact your local Rockwell Automation representative for any technical support issues.

New Product Satisfaction Return

Rockwell Automation tests all of its products to ensure that they are fully operational when shipped from the manufacturing facility. However, if your product is not functioning and needs to be returned, follow these procedures.

<table>
<thead>
<tr>
