

FASTRAK

C E N T E R L I N E ° 2 5 0 0

When time is of the essence, FasTrak provides an opportunity to receive your customized Motor Control Center quicker than what would traditionally be an engineered order. With a 7 to 9 week lead time, you can get the majority of an Engineered to Order Project, including the engineering review and engineering/customer kick-off.

Because timing and configuration is important to your business, please discuss all the details with your MCC Specialist. Dependant on your specific needs, they have everything you need to decide if FasTrak is right for your order.

SOLVE.®

 Allen-Bradley • Rockwell Software

**Rockwell
Automation**

What's Included

- Assembled MCCs
- Include up to 15 columns per item
- No order level limitation
- Special wiring diagrams
- Preferred Fastrak configurations are detailed in the Centerline 2500 Technical Data Guide (2500-TD004)

Note: Approvals, customer inspection and witness test available but extends Fastrak lead times

What's Not Included

- Unassembled MCCs
- Modifications which require additional width to the section
- Special paint
- Customer Specific Program

Motor Control Center Delivery Programs Comparison

	Engineered to Order (ETO)	FasTrak
Short Description	A completely customized motor control center ordered specifically for a customer.	For customers who have a time constraint on what would traditionally be an ETO configuration.
Lead Times	12-16 weeks	7 to 9 weeks
