

# VersaView 6300M Industrial Monitors

## Features and Benefits

- Provides up to full high definition (FHD) resolution with a 16 million color LED backlight display in different sizes and aspect ratios from 10.1" to 24"
- DVI and DisplayPort inputs are available on all monitors
- Variations in standard and wide screen formats
- Resolutions include FHD / HD / SVGA / SXGA / XGA / WXGA
- Analog resistive or projected capacitive display (for multi-touch operation)
- Available with Standard and Low Profile bezels
- IP65 / IP66 (model dependent)
- Includes 3 x USB 2.0, rear plus 1 x USB 2.0 (Type-A, front) on standard bezel aluminum
- Operating temperature: 0 to 50C
- 24V DC isolated or 100-230V AC power
- Features standard units in resolutions up to full high definition displays with the following bezel variants:
  - Aluminum
  - Stainless Steel True Flat
- Low Profile units feature full, high definition widescreen displays for a modern look with the following bezel variants:
  - Aluminum
  - Aluminum Glass True Flat
- CE, cULus Listed, RCM

Low Profile Bezel

Standard Bezel

VersaView® 6300 is a complete portfolio of open architecture industrial PCs, thin clients and monitors. This broad and adaptable line offers the flexibility you need to meet your specific performance requirements. This product family is a solid match for customers that need a high-performance Human Machine Interface (HMI) solution for industrial environments. By integrating completely with our FactoryTalk® View SE and FactoryTalk View ME software, it allows for seamless assimilation within your facility.

The VersaView 6300M industrial monitor includes a ten-point multitouch screen that can also be operated with gloves. The touch screens are precalibrated so that recalibration is not necessary. These monitors are optimized to work with the VersaView 6300 computer and thin client portfolio to create a visualization, maintenance, control or information computing solution.

Design considerations are becoming more important in the machine-builder world. Low Profile bezels on wide screen displays and monitors provide that ultra-modern look to visually set this equipment apart from the crowd.

Additionally, VersaView 6300M has various design options available making this robust product family a great choice for plant floor environments.
