

Lockout/Tagout Services

Delivering Comprehensive Lockout/Tagout and Hazardous Energy Control Solutions

Features and Benefits

Our lockout/tagout (LOTO) services can help you efficiently perform routine maintenance and help to meet compliance requirements for all electrical, mechanical, pneumatic, chemical, hydraulic or thermal equipment.

A team of dedicated LOTO engineers will provide you best-in-class experience, helping you comply with the most recent U.S. and international standards.

Audits, Services and Training

Proactively manage employee safety while optimizing productivity with the help of:

- Annual audit support
- LOTO services, including the development of graphical safety procedures
- LOTO training for employees to help you maintain compliance
- Electronic LOTO management system (ScanESC)
- Development of Standard Operation Procedures (SOP)
- Development of Alternative De-energization Procedures (ADP)
- Confined space assessments

In addition, electronic LOTO programs digitize part or all of your LOTO program to keep it current and help improve productivity.

Solutions to Help Keep Employees Safe

Our engineering specialists have custom created a world-class lockout/tagout solution that not only meets local and global standards like OSHA and ISO, but also achieves efficiencies for programs not normally known for improving your bottom line.

We assess your unique hazardous energy control needs, then custom tailor a solution that meets all applicable state and federal regulations.

From audits and services to training and digitization, our LOTO solutions can be an efficient way to keep employees safe.

Machine-Specific Graphical Procedures

- ✓ Energy disconnects and control points are shown by symbols on the procedure placard.
- ✓ Procedures are mounted prominently at the point of use on the machine.
- ✓ Color-coded tags are mounted onto each machine's energy disconnects and control points.
- ✓ No proprietary software: All electronic files are created in Microsoft Office and will also be delivered on a USB drive, enabling you to own and manage your program after implementation.

Other Lockout/Tagout Services

In addition to graphical procedures, Rockwell Automation offers other products and services to complement your company's lockout/tagout program and help you complete your steps to full compliance.

TRAINING

When you make changes to your policy, introduce a new lockout/tagout procedure format, or find deficiencies in your lockout/tagout program, we can re-train all authorized employees to confirm full comprehension and understanding.

ANNUAL POLICY AUDITS

By outsourcing to lockout/tagout specialists, you will have the peace of mind that your audit is performed accurately, efficiently, and with less down time.

DEVICE RECOMMENDATION

We continuously test new lockout devices to confirm they work and are user-friendly. Each lockout/tagout program completed by Rockwell Automation includes a site evaluation and list of recommended locks, devices, and lockout device stations.

Why Choose Rockwell Automation for your Lockout/Tagout Compliance Needs?

Our company has decades of experience and a name you can trust. We will be here to serve you when you need us.

Our programs provide industry leading value that can be measured and return on your investment.

Our employees have industry leading expertise, specializing in lockout/tagout program implementation.

Our systems work in tandem with our services to provide you a truly comprehensive solution that is compliant and efficient.

Our unique ScanESC™ software allows you to proactively manage your lockout/tagout program from virtually anywhere.

Rockwell Automation Safety Services

Are you tapping into safety's potential? Industrial safety is an opportunity to meet compliance requirements, reduce risk and maximize productivity.

Bolstered by the emergence of seamless connectivity and modern control technologies, industrial safety can be a powerful tool that benefits your workers, your operations, and your bottom line.

Our People and Asset Safety Services meet your needs, with a focus on hazardous energy control, electrical safety, and machine safety services. We can help you protect employees and comply with the latest standards. And we can work with you to find ways to improve safety and reduce risk while optimizing worker and asset productivity.
