Workstation Functionality

You can use this workstation to develop and build a solid foundation of CompactLogix and automation system knowledge. With this workstation, you can become familiar with a variety of automation hardware and software. This workstation allows you to establish communications and program a basic RSLogix 5000® project. You can also configure drives and visualization applications. EtherNet/IP is also included for distributed control.

Training Purpose

This workstation is intended for customers who want to practice those job tasks that are not frequently performed on the plant floor. The workstation is designed to be used as an aid for strengthening and maintaining skill sets.
