Bulletin 700-FE and 700-FS
Timing Relays

Why Migrate?

Rockwell Automation is launching a new line of DIN rail mount timing relays. These new products will replace existing 700-FE and 700-FS catalog numbers that will be discontinued in March 2022 (Haz Loc versions will be discontinued in September 2022). Migrate now to the new 700-FE and 700-FS timing relays as the current product will only be available until stock is depleted.

New product benefits:

- Ease of selection
- Reduced inventory
- New functions

Mitigate and Eliminate the Risks of Automation Obsolescence

Rockwell Automation understands that your control panels are a critical asset in your automation system, and we support that by providing you with the latest technology to maximize your investment. New technologies can improve and extend the operation of existing equipment and provide an immediate boost to productivity. By migrating from your legacy 700-FS and 700-FE timing relay products and related legacy 700-FS and 700-FE safety contactors and relays, you can help to decrease downtime and optimize operations well into the future.

We will help you to meet this demand to innovate by proactively planning and managing your transition every step of the way to help you get the highest possible return on your automation investment.

A note on functional replacements:

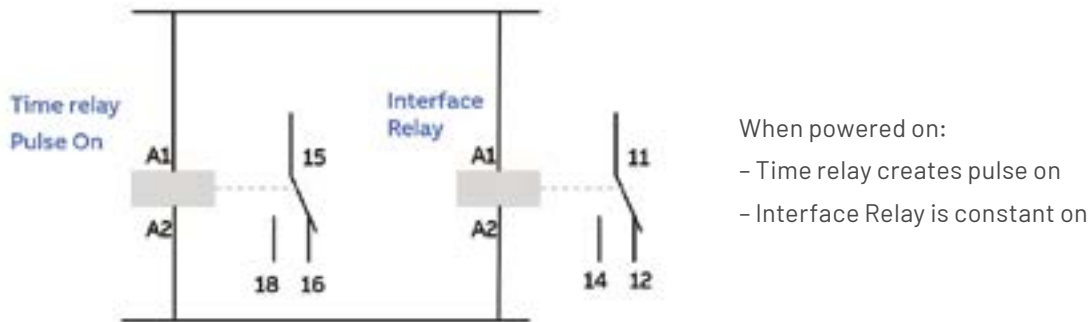

All replacements require that the T Range (for 700-FS) or range (for 700-FE) dials be set to the desired time range. The multi-function products (700-FSM* and 700-FEM*) must be set to the desired function code letter. For details on the new timing functions, please see publication 700-TD552H-EN-P.

Where a 700-FS replaces a 700-FE, or vice versa, the dimensions are different, and any associated mechanical drawings would require some correction.

A note on the legacy 700-FS DPDT with switch to set one contact to instantaneous and on timed:

This functionality is no longer available on the new product. To achieve this same functionality with the new product, we recommend adding a 700-HL relay in parallel.
