

FAST, FLEXIBLE UNIT WIRING

CENTERLINE 2100 NEMA Motor Control Center Quick-Wire Program for OEMs, System Integrators and Power Packagers

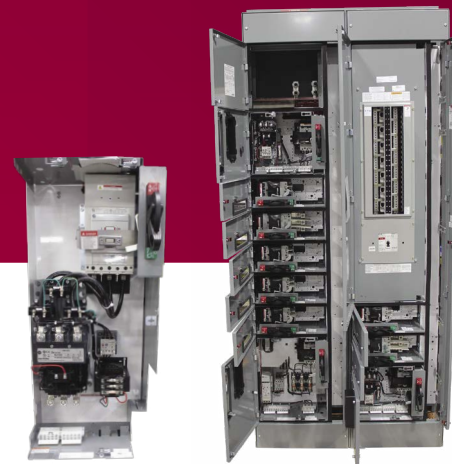

There are times when standard, off-the-shelf wiring just isn't going to cut it.

Your customers want MCC units with customized control wiring, and they don't want to wait. Long lead times on units with customized control wiring can make customers frustrated, or worse, cost you business.

Enter: the Quick-Wire program for CENTERLINE® 2100 MCCs. Quick-Wire program units have complete power wiring, but omit control wiring, allowing you to customize units for your customers. The ready-to-order units in the Quick-Wire program have faster lead times than custom-engineered orders and can ship in as little as two weeks. The quick lead time gets the MCC to you faster, so that you can begin the work of customizing and differentiating the units for your customers.

Quick-Wire program unit types

Unit Type	Catalog Number	Rating at 480V	Rating at 600V
Full Voltage Reversing and Non-Reversing Starter Units	2106, 2107	0.5...200 HP	0.5...200 HP
	2112, 2113	0.5...400 HP	0.5...400 HP
