by ROCKWELL AUTOMATION

853C & 853D On-Machine™ LED indicators

Turn machine status into actionable information

Help machine builders and End Users see issues sooner, respond faster and keep production moving with clear visual and audible indication, software-configurable behavior and IO-Link device data.

Flexible design
Custom colors, patterns, tones, escalation logic

Built for the machine
Compact form factor and IP69K-rated construction

35MM AND 55MM DEVICES
Discrete, programmable and IO-Link options

SEE clear machine status

RESPOND faster operator action

PREVENT issues before downtime

Help increase machine uptime
Identify and resolve issues faster
Clear visual indication, audible alerts, alarms and diagnostics can help operators respond quickly and improve machine availability.

Accelerate machine commissioning
Simplify setup and verification
Configuration software, offline setup, playback verification, and templates can help streamline startup and deployment activities.

Help enable predictive maintenance
Use IO-Link device data
Temperature, voltage, alarms, operating hours, and device health information provide insights that can help maintenance teams identify potential issues earlier.

Help improve reliability in harsh environments
Designed for demanding applications
IP69K-rated construction and global certifications support use directly on machines operating in a wide range of industrial environments.

Help reduce engineering and inventory costs
Configure one device for many designs
Custom colors, patterns, tones and escalation logic can help reduce unique SKUs and simplify machine design.

VALUE ACROSS THE MACHINE LIFECYCLE

Machine builders
Simpler design, fewer variants, faster commissioning

End users
Greater uptime, faster response, better maintenance insight

TARGET INDUSTRIES

Food & Beverage/Life Sciences | Material Handling & Packaging | Household & Personal Care | Automotive
