306-3	Significant spills	2020 Sustainability Report ; SASB Reference Table, page 44
306-4	Transport of hazardous waste	860,819 lbs. of hazardous waste was transported by licensed contractors to licensed disposal facilities. Rockwell Automation does not import, export, or treat hazardous waste. 0% of Rockwell Automation's hazardous waste was shipped internationally. Location specific definitions of hazardous and destinations of waste.
306-5	Water bodies affected by water discharges and/or runoff	www.cdp.net ; Rockwell Automation Water Security 2020 Report

307-1	Non-compliance with environmental laws and regulations	Rockwell Automation had no significant fines and/or sanctions, no major non-compliances, and no monetary fines in 2020.
401-1	New employee hires and employee turnover	Table 401-1 , GRI Page 12
401-2	Benefits provided to full-time employees that are not provided to temporary or part-time employees	Rockwell Automation prioritizes employee health and well-being. Employee assistance and work life benefits are provided to all global employees. Our comprehensive benefits include healthcare benefits, protection benefits, paid time off, and leave programs. Rockwell Automation offers plans and resources to help employees meet future savings goals through defined benefit and retirement savings plans. We offer flextime, remote work, and part-time arrangements whenever business conditions permit.
403-1	Occupational health and safety management system	2020 Sustainability Report ; Employee well-being, page 19

403-2	Hazard identification, risk assessment, and incident investigation	<p>Rockwell Automation maintains rigorous and mature corporate global Environment, Health and Safety (EHS) management systems that include: a corporate set of EHS policies and procedures, a common EHS program, including global EHS objectives and targets, as well as training resources for implementing EHS programs at all locations worldwide. This program ensures the identification and mitigation and control of EHS risks to employees as a key business principle. The objective of Rockwell Automation’s global EHS program is to provide governance, oversight, and direction for managing EHS risks posed by our activities.</p> <p>We take a holistic approach ensuring a high standard of excellence across our operations. Rockwell Automation maintains a common certification for both ISO14001 and 45001. We maintain EHS objectives, programs, and targets at both local and corporate levels, to drive compliance to goals. We measure progress against identified key performance criteria, which include both leading and lagging indicators and EHS initiatives implemented during the year. We report this information to the EHS management team and senior leadership.</p> <p>An employee near miss and hazard reporting process is in place and tracked as a leading indicator for all locations.</p> <p>Rockwell Automation has an Ombuds program support our Code of Conduct where employees can voice concerns, even anonymously, for investigation and action. Employees can remove themselves from any unsafe or dangerous situation.</p> <p>An incident reporting process, including investigations, root cause analysis, and corrective action tracking is in place at all locations.</p>
403-3	Occupational health services	<p>All employees have access to occupational health services, appropriate for the risks they may be exposed to at work, and they are informed of this access annually. These occupational health services may be either internal and/or external. The results of occupational health exposure monitoring are available only to the respective worker and the required EHS and occupational health staff. In rare cases of exposures above acceptable levels, managers and/or supervisors may help resolve an exposure problem, but they would not receive access to an individual’s occupational health records. The use of information from occupational health records for any negative treatment of an employee would be a direct violation of our ethics policies. Key health issues for the business include stress, musculoskeletal/ergonomic issues, and electrical hazards. Rockwell Automation provides employees with a personal counseling phone service staffed by professional consultants who provide practical solutions, information, and support on life, health, family, work, and finances. This service includes access to a website covering these topics, including health-related information to encourage our employees to take care of themselves, keep fit, eat healthy, get adequate rest, and understand and cope with medical conditions.</p>

403-4	Worker participation, consultation, and communication on occupational health and safety	Employees are actively engaged in health and safety through training, internal and external auditing, regular communications, and system performance. Employee communications include meetings, training events, and periodic presentation of health and safety topics. Special employee engagement events, such as Safety Week, occur at many locations. Work councils, where in place, are proactively engaged in the review of health and safety programs and advise on matters of work safety and accident prevention.
403-5	Worker training on occupational health and safety	2020 Sustainability Report ; Employee well-being, page 19
403-7	Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	<p>The health and safety of our people (including partners and visitors) is a top priority. We are committed to compliance to safety regulations, while meeting and exceeding customer expectations for our products and services. In addition, we maintain a comprehensive contractor safety process and handbook to communicate expectations for risk mitigation while conducting work at our locations.</p> <p>We offer one the broadest safety products and services portfolios in the industry, to help our customer achieve both safety and productivity goals in process and manufacturing applications. Safety Policy Safety Products 2020 Sustainability Report Employee well-being, page 19</p>
403-8	Workers covered by an occupational health and safety management system	<p>2020 Sustainability Report; 2020 At a Glance, page 3</p> <p>Over 8,000 employees at 19 locations are covered by the Safety Management Systems.</p> <p>All 19 locations are internally and externally audited.</p>
