

Discover, Analyze, Manage

Manage your software and firmware with ease

Rockwell Automation offers complimentary products: FactoryTalk® Updater, ControlFLASH Plus™ and Product Compatibility & Download Center to assist with software and firmware management.

EXPLORE CAPABILITIES

01

DISCOVER

Gain instant visibility of your Rockwell Automation software and firmware install base. Know exactly what software and licenses you have, the version of your firmware, and more at the local or enterprise level.

02

ANALYZE

Automatically get personalized software and firmware information to better understand how your products compare to what is available to you. View the curated and consolidated information to make data-driven decisions.

03

MANAGE

From exporting the data for further analysis to queuing patches for deployment, this suite of products has built-in capabilities to help efficiently manage software and firmware in your enterprise.

KEY FEATURES

Set up notifications directly from our release website to your inbox.

[Product Compatibility and Download Center](#)

Scale visibility to create a full picture of who is using what.

[FactoryTalk® Updater](#)

Stay up to date by queuing monthly patch roll ups at once for on-demand updates.

[FactoryTalk® Updater](#)

Automatically see what software and firmware you have installed.

[FactoryTalk® Updater](#) | [ControlFLASH Plus™](#)

Export your usage data to analyze habits.

[FactoryTalk® Updater](#)

Deploy firmware changes in bulk.

[ControlFLASH Plus™](#)
