

Gain complete **control** and **visibility** of your production environment.

As your manufacturing process becomes more complex, it gets harder to manage and optimize your operations. A **My Equipment** subscription puts you back in control, providing data-rich insights to help you improve asset utilization, lower risk, and minimize downtime across your enterprise.

How well do you know the assets in your facility?

\$65B

of automation systems' installed base, is nearing end of life

(Source: ARC)

Know your risk of costly downtime.

40%

of unscheduled downtime is caused by aging equipment

(Source: 2019 Plant Engineering Maintenance Report)

Make the shift from passive to active management.

10X

ROI average savings from proactive maintenance strategies vs. reactive

(Source: Operations & Maintenance Best Practices Guide 3.0)

Transform your asset management with a **My Equipment** subscription

My Equipment features intuitive dashboards and reporting tools that give you complete visibility of your assets, enabling you to:

REDUCE operational cost

- Lower inventory carrying costs
- Build spares strategies
- Reduce data collection costs

DECREASE enterprise risk

- Gain instant visibility into product cybersecurity vulnerabilities
- Assess and mitigate obsolescence risk
- Receive proactive alerts for devices impacted by obsolescence status change and product safety advisories

IMPROVE asset utilization

- Enhance device availability for critical inventory
- Enable compatibility planning
- Reduce downtime associated with extended device replacements

Make the shift from passive to **active management**
