**Learning+ Training subscriptions** combine the self-paced experience of e-learning with in-class collaboration with instructors, labs, and additional training content - all in a virtual environment. It provides the flexibility and convenience of learning when and where you need it most. Learning+ training courses can be taken on any tablet or PC using Chrome, Safari, IE, Edge, or Firefox, and all content is narrated, and has a viewable transcript.

In person hands-on learning is an effective way to increase job-related skills – when practical. We offer a wide range of courses to help get employees trained on Rockwell Automation technologies. Courses are designed to align with specific job functions and focus on relevant job tasks. Courses are conducted at Rockwell Automation and partner locations or can be held for private audience at customer sites, if sending your employees to off-site training is disruptive to production.

Virtual training sessions with a Rockwell Automation specialist allow you to discuss technology-specific scenarios, improve your technical expertise, or expand upon your e-learning experience. Ask questions and get information about the topics specific to your job. Select either four-hour or eight-hour sessions for 1:1 coaching or virtual groups of up to six students. Technology topics include Logix, motion, drives, visualization, networks, and safety technologies. Start your custom technical training today.

As part of the Lifecycle Services suite, these consultation-based offerings are focused on helping you assess, train, and measure your industrial workforce. A Global Workforce Solutions engagement provides quality content to help you design and implement a sustainable, flexible solution that promotes retained knowledge, while continuously measuring the value through ongoing alignment and analysis. GWS solutions consist of a range of offerings including self-paced, virtual, and instructor-led training.
