

The Best Finishing and Treatment Metals Solutions

Rockwell Automation has continually **advanced our metals solutions for over 40 years** to offer our customers the best finishing and treatment control and drive system based on the most feature-rich interface that allows them to improve reliability, production, and quality.

PROBLEM:

Do you need better visibility and advanced automation for your finishing line?

With your current control and drive system:

- Do operators struggle to figure out why your line is not controlling line parameters at preset value?
- Does your system automatically indicate first out root cause when your finishing line is down?
- Does your system include fast data acquisition to quickly identify root cause of abnormal event?

SOLUTION

If your system does not include this functionality, ask your representative about the most advanced finishing line solution from Rockwell Automation.

Rockwell Automation has a team of design engineers, project managers, and field service engineers dedicated to metals industry with expertise in coordinated drive system solutions. We also offer the best lifecycle support with onsite and remote support options to meet your specific needs.

Reduce Risk with Proven Standards

Our proven global standards are available for most treatment and finishing lines. Adhering to these global standards minimizes project risk and provides additional benefits:

- **Simplify** operator functions and training
- **Maximize** production and reliability
- **Accelerate** making sellable product

A core component to these solutions is our **PremierSystems™** toolset and advanced diagnostic features, which is included with systems delivered by Rockwell Automation.

The PremierSystems toolset is designed to bring all needed data into the simplified operator interface and **can identify root cause up to 80%** faster than traditional methods. The high-speed **Enhanced Trend Plus** trending tool is also available to simplify the most complex troubleshooting tasks.

Our solutions are designed to simplify routine operator tasks, provide advanced predictive maintenance notification, and rationalize alarms so the operator can focus on operating the machine and production can be optimized.

Finishing Line solutions delivered by Rockwell Automation include:

- **Application** consultation
- **Installation engineering**, planning, and support
- **Design tools** and industry standard library
- **Simulated** factory acceptance test
- **Commissioning** and startup
- **Digital project** documentation
- **Hand off** to tech support and local service engineers

A finishing line solution delivered by Rockwell Automation will include the following benefit to your line:

- **Lowest** risk
- **Faster** time to production
- **Improved** quality
- **Long-term** support

Schedule time with your Rockwell Automation representative to discuss these benefits and ask for a demonstration of PremierSystems to see how this feature-rich toolset can help your operations, production, maintenance, and engineering teams.
