

# Get started

- 1  **Download the Vuforia® View app** from the Google Play or Apple App Store. Then, **open it** on your device
- 2  **Scan** the QR code
- 3 **Go to** the Experience Library
- 4 **Search For** “Mining Ball Mill”

**Hi, I’m Dale** — mining site manager.  
I keep our equipment up and running. Want to tag along with me today?

A ball mill reduces the rocks to powder size. Then, we send this powder off for chemical processing so we can extract the good stuff! If a ball mill goes down, our entire process comes to a screeching halt.

## Use your tablet or phone to help Dale see what’s going on with the ball mill.

Point your camera to any flat surface to position the ball mill. Tap to place it.

Hover around and see performance and maintenance details for key parts of the mill.

I can see the status of the equipment that makes the ball mill function: control systems, drives and motor control.

Oh no! There is a drive pump failure!

Click on the alert to see step-by-step directions to make the repair.

Thanks to FactoryTalk® InnovationSuite, I can monitor the status of this mill in real time, on-site or remotely. And if something breaks, I have the directions I need to make a repair.

### Modernize and empower your workforce

Use AR and 3D interactions for guided step-by-step work instructions to improve performance, safety and morale — and reduce costs.

### Predict issues before they happen

Resolve issues with access to performance analytics.

### Make downtime a thing of the past

Use real-time monitoring to avoid unplanned downtime and maximize asset utilization.
