

The Best Paper Machine Web Handling Solutions

Rockwell Automation has continually **advanced our paper solutions for over 40 years** to offer our customers the best web handling drive system and the most feature-rich interface that allows them to improve reliability, production, and quality.

PROBLEM:

Do you need better visibility and advanced automation for your paper machine's web handling system?

With your current paper machine drive system:

- Do operators struggle to figure out why your machine is not operating at centerline?
- Does your system automatically indicate first out root cause when your web handling system is down?

SOLUTION

If your system does not include this functionality, ask your representative about the most advanced paper web handling solution from Rockwell Automation.

Rockwell Automation has a team of design engineers, project managers, and field service engineers dedicated to paper web handling coordinated drive system solutions. We also offer the best lifecycle support with onsite and remote support options to meet your specific needs.

Reduce Risk with Proven Standards

Our proven global standards are available for tissue, paper, paperboard machines and winders. Adhering to these global standards minimizes project risk and provides additional benefits:

- **Simplify** operator functions and training
- **Maximize** production and reliability
- **Accelerate** making sellable product

A core component to these solutions is our **PremierSystems™** drive system supervisory and diagnostic tool, which is included with systems delivered by Rockwell Automation.

The PremierSystems tool is designed to bring all needed data into the simplified operator interface and **can identify root cause up to 80%** faster than traditional methods. The high-speed **Enhanced Trend Plus** trending tool is also available to simplify the most complex troubleshooting tasks.

Our solutions are designed to simplify routine operator tasks, provide advanced predictive maintenance notification, and rationalize alarms so the operator can focus on operating the machine and production can be optimized.

Web handling solutions delivered by Rockwell Automation include:

- **Application** consultation
- **Installation engineering**, planning, and support
- **Design tools** and industry standard library
- **Simulated** factory acceptance test
- **Commissioning** and startup
- **Digital project** documentation
- **Hand off** to tech support and local service engineers

A web handling solution delivered by Rockwell Automation will benefit your paper mill:

- **Lowest** risk
- **Faster** time to production
- **Improved** quality
- **Long-term** support

Schedule time with your Rockwell Automation representative to discuss these benefits and ask for a demonstration of PremierSystems to see how this feature-rich toolset can help your operations, production, maintenance, and engineering teams.
