SAMSON Controls

Smart in flow control

At SAMSON, innovation is tradition. Our company has always been at the forefront of the process and automation industry, propelled by our core values. Today and tomorrow, we continue to lead with forward-thinking ideas for Industry 4.0 and beyond.

Control valves and Intelligent valve controllers

SAMSON Controls provide the most comprehensive control valve and regulator portfolio in the world today. By adding our smart positioner to any manufacturer's linear or rotary control valve, you will have the most precise control and augmented data giving insights into valve performance and process conditions.

Lower total cost of ownership

By sizing and selecting the right control valve for a customer's application, SAMSON provides control valve solutions that require less maintenance, fewer spare parts, and over the life cycle of the control valve, we lower your Total Cost of Ownership.

Reduce control valve costs

- Designed and Built Valves for Specific Application
- Lower Maintenance and Spare Parts

Precision in process

SAMSON's smart positioners are used in every industry and on every manufacturer's linear and rotary control valves. The precise motion of the positioner results in more precise control over the process, resulting in better overall control while providing enhanced diagnostics to the control system.

Increase profitability

- Less energy usage
- Less raw ingredient use
- Enhanced process data

Innovative

Whether looking at the evolution of our positioners, our valve asset management, or our enterprise predictive analytics platform we are continuing to create new solutions to enhance the value we provide to the process industry.

Innovation for process

- Enhanced data
- Valve Asset Management
- Predictive Analytics

Control valves and intelligent valve controllers

- Control Valves
- Smart Positioners
- Valve Asset Management
- Regulators

Industries we support

- Chemical & Petrochemical
- Food & Beverage
- Pharmaceutical & Biotechnology
- Oil & Gas
- Mining & Metallurgy
- Pulp & Paper
- Power & Energy

About us

Established in 1907, SAMSON has become a market leader in control valves for industrial process automation. Our technology has proven its value worldwide in a variety of industries. We are trusted in many of the world’s most challenging applications to achieve precise control with a high level of safety and reliability. SAMSON employs over 4300 worldwide staff and is represented in more than 50 countries by 62 independent subsidiaries and 79 engineering and sales offices to provide best in class local sales and service.
