

Dream Report

The leader in industrial reporting technology

Regulatory requirements, and ready access to operational performance KPIs to run your business better, are key drivers for the need for a high performance reporting and dashboarding solution.

Dream Report

Dream Report is the leading programming-free, user-friendly, automated reporting and data analysis software designed specifically for industrial automation applications. It is designed to be the simplest solution for extracting data from virtually any data source – process and business. With automated reports and dashboards, Dream Report provides production insights and compliance reporting to anybody, anywhere and anytime.

Manufacturing insights

For continuous improvement, Dream Report helps you maximize the context and value of your plant data, through automated reports and interactive dashboards.

- Contextualize plant data
- Automate information sharing
- Maximize the ROI on your data

Regulatory & compliance

Meeting compliance standards drives accountability. Whether driven by customer requirements, or requirements from regulatory bodies, you need a solution that helps deliver those “must have” reports.

- Regulations and best practices
- FDA 21CFR Part11 compliance
- Audit trails & e-Signatures

Ad hoc analysis

You also need tools to better understand your data, and the relationships between data from different systems.

- Single tool for all plant data
- Correlate and aggregate
- Share your insights

Built for every industry...

- Water & Wastewater
- Life Sciences – Pharma & BioTech
- Food and Beverage
- Oil & Gas
- Infrastructure – BAS & Energy Management
- Machinery, Metals & Mining
- General Manufacturing
- Power Generation & Distribution
- Data Centers

About us

Ocean Data Systems makes Dream Report, the leading – programming free, user-friendly, automated reporting and data analysis software designed specifically for industrial applications. It is the simplest solution for automatically extracting data from any source to provide automated reports to anyone, anywhere and anytime.
