

# Weighing solutions for process and packaging

**Easiest to use | Highest performance | Lowest total cost**

Hardy offers innovative ways to increase your OEE (Overall Equipment Efficiency) which lowers your total cost of ownership. Having a business partner that understands the technical aspects of weighing, on hand to help you answer questions, is the most effective way to satisfy your quality constraints and achieve the most profit for your plant.

## Integrated Weighing Solutions provide premier integration with Rockwell Automation Allen-Bradley PLCs

Hardy products use Add-On-Profiles, EDS-AOPs, Faceplates and Add-on-Instructions as well as value added features to make it easy to integrate with Rockwell Automation. The Hardy Process Toolbox reduces the cost of installation and maintenance uses C2<sup>®</sup> electronic calibration, Integrated Technician<sup>®</sup> and a Webserver to perform system diagnostics from anywhere on your network.

### Easiest to use

Premier Integration with Allen-Bradley PLCs provide seamless integration and easy to use controls via AOPs, Faceplates, and Add-on Instructions for common weighing functions. Direct access to instrument controls in an intuitive and friendly way. A built-in Webserver allows anyone with basic scale knowledge to set-up and operate.

#### Key takeaways

- Premier Integration with Rockwell Automation
- Easy to Install, Operate and Maintain

### Highest performance

Hardy's instruments and modules enhance the productivity of process manufacturing systems where fast, precise weight-based controls are critical. State-of-the-art in processing uniformity and speed. A/D conversion, weight processing and communications, instruments update from 55 to 660 times per second, providing the PLC with the latest processed weight readings.

#### Key takeaways

- Greater Process Control
- Faster Throughput
- Backplane Integration

### Lowest total cost

Hardy offers innovative ways to reduce your Total Cost of Ownership enabling you to apply sustainable production practices. Hardy products use value added features to reduce the cost of installation and maintenance. Provides Operational Data on your network with communication upstream and to other devices on The Connected Enterprise<sup>®</sup>.

#### Key takeaways

- Increased OEE
- Weight Data On Your Network

## List of products or product families within the portfolio

- Weight Modules & Instruments
- Load Cells & Scales
- Caseweighers & Checkweighers
- Feeder Controls & Dispenser/Fillers

## Industries we support

- Food & Beverage
- Chemicals
- Consumer Packaged Goods
- Pharmaceuticals & Biotech
- Building Materials
- Mining & Minerals
- Metals
- Industrial Manufacturing

## About us

Hardy Process Solutions delivers high performance weighing solutions with the lowest Total Cost to Own. We include Industry Leading Technology in all our scales and instruments to make it easy for you to install, integrate and maintain. Powerful solutions that are easy to use are why our customers realize increased production efficiency.
