

CENTERLINE® Motor Control Centers with IntelliCENTER® Technology Field Support Kit

General Description

Mini network

Assorted components for DeviceNet

DeviceNet Configuration Terminal

CENTERLINE Motor Control Centers (MCCs) with IntelliCENTER Technology provide users with a DeviceNet network that is wired, commissioned and tested, resulting in a true plug-and-play integrated solution. As with any control system, a successful installation requires the proper tools. This kit includes an assortment of DeviceNet-related components that will prove helpful for:

- Starting up a DeviceNet system
- Commissioning DeviceNet nodes (setting baud rate and node number)
- Testing DeviceNet devices
- Training on DeviceNet

The kit includes a mini network, a DeviceNet configurator tool and assorted components.

Customer Benefits

The kit eliminates the need for users to order a multitude of separate components and increases the likelihood of users having the right tools for a successful DeviceNet MCC installation. The kit (2100H-DFSK2) also affords users with the ability to test devices on a separate mini network.

Kit Features

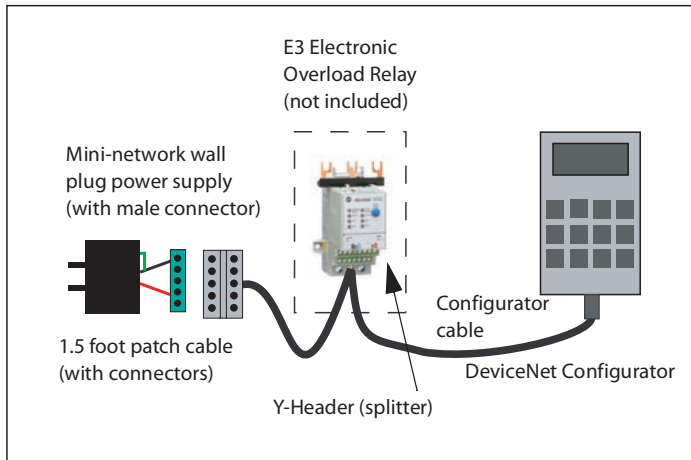

Mini network	DeviceNet Configurator Tool	Assorted components for DeviceNet
<ul style="list-style-type: none"> • Trunkline with three DeviceNet ports and terminating resistors • 10 ft. patch cable • 1.5 ft. patch cable • 24Vdc power supply 	<ul style="list-style-type: none"> • DeviceNet Configuration Terminal (193-DNCT) with 1 meter cable 	<ul style="list-style-type: none"> • (5) terminating resistors • (10) 5-terminal plug connectors • (5) 10-terminal plug connectors • (2) 5-terminal male connectors • 10 ft. round Class 1 DeviceNet cable • Narrow-tip screwdriver for DeviceNet connectors • DeviceNet Y-Header

Applications

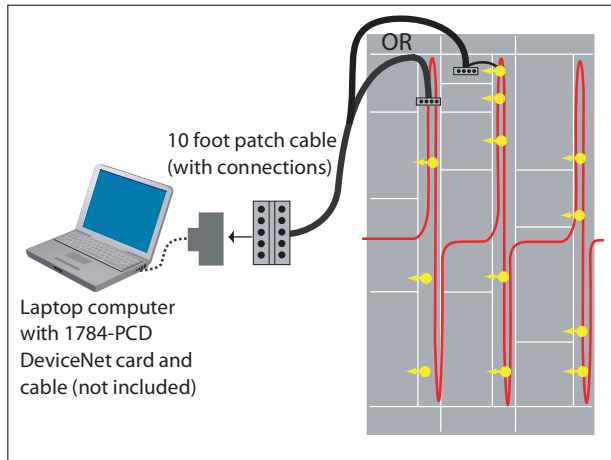

Mini Network

Stand Alone Configurator Tool

Connecting to a Motor Control Center
