

QuickStick HT 1 m Motor

Catalog Number 700-1483-00

- QuickStick High Thrust systems consist of modules that include motors mounted to user-designed support structures, magnet arrays mounted to user-designed vehicles, motor controllers, system controllers, and power supplies.
- All QSHT motors contain integral position sensing and use external QuickStick High Thrust Motor Controllers.
- Mounting holes are located on the motor bottom for mounting.
- Motor is designed for IP67 (IEC 60529), motor controller is designed for IP20 and can be located remotely.
- CE Certified, UL Recognized.

Physical Specifications

Dimensions^{*}: 104.0 W x 73.0 H x 966.4 L

Weight: 37.6 kg [83.0 lbs]

* All dimensions are millimeters. Contact MagneMotion for detailed drawings.

Electrical Specifications

Power Rating, Max[†]: 10 A RMS continuous,
14 A RMS overload (2 sec max) @
400 V max

[†] The drive current to the stator is controlled by the QSHT controller and is thermally limited.

[‡] Operating performance will vary based on payloads, acceleration and velocity settings, and vehicle density.

[§] Maximum Acceleration and Velocity are at recommended maximum payload.

[¶] Thrust at Nominal Vehicle Gap (distance between the magnet array and the motor) of 12 mm, per magnet array cycle.

[◇] Repeatability is dependent on the size of the gap between the motor and the vehicle and may vary based on track and vehicle design/structure. Repeatability is not applicable over the gaps between motors.

Environmental Specifications

Ambient Temperature: 0 °C to 50 °C at rated power
0 °C to 85 °C with power derating

Relative Humidity: N/A

Performance Specifications[‡]

Acceleration, Max[§]: 60 m/s² [6.1 g] payload dependent

Velocity, Max[§]: 3.5 m/s [7.8 mph]

Thrust, Max[¶]: 25% duty cycle – 190 N/cycle
100% duty cycle – 99 N/cycle

Servo Repeatability[◇]: ±1 mm [0.04 in] nominal

Recommended Maximum Payload: 4,500 kg [9900 lb] per vehicle
(determined by magnet array length and support structure)

Rockwell Automation Support
